

**Figure S1.** Dynamics of indexed values of EDV and ESV in the comparison groups. Note: \*  $p < 0.05$ , \*\*  $p < 0.01$ —significant differences between the values on days 7–9 and subsequent visits; #  $p < 0.05$ , ##  $p < 0.01$ —significant intergroup differences; EDVI, end diastolic volume index; ESVI, end systolic volume index.
