

Table S1. Percentage of UV radiation transmitted under each type of net (mean \pm SE). Different letters between Standard net and Photosensitive net refer to significant differences (student t-test, $P < 0.05$).

Experiment	Standard net	Photosensitive net
Field experiment	48.93 \pm 1.30a	20.39 \pm 0.88b
Fitness-related parameters	99.46 \pm 7.56a	61.63 \pm 5.01b
Foraging behaviour	87.04 \pm 6.01a	49.29 \pm 4.43b
