

Figure S1. The SDS-PAGE gel electrophoresis result. A and J, Protein molecular weight marker; B, Bacterial solution before IPTG induction; C, Bacterial solution after IPTG induction; D, Centrifugal supernatant after ultrasonication; E, Centrifugal precipitation after ultrasonication; F, Protein waste liquid; G-I, AcerOBP6 eluted with 50, 100 and 300 mmol/L imidazole solution, respectively; K, AcerOBP6 after renaturation and concentration; L, Purified AcerOBP6 protein after removal of his-tag.
