

Table S1. Sampling localities and accession numbers.

N: number of individuals sequenced. COIA: segment A of the cytochrome oxidase subunit I gene. COIB: segment B of the cytochrome oxidase subunit I gene. cyt b: cytochrome oxidase b gene segment. ND4: NADH dehydrogenase subunit 4 gene segment. Superscript letter in the accession number: ^a sequenced in [11], ^b sequenced in [7], ^c sequenced in [9]. Accession number without superscript indicates sequences obtained in this study. --- : segment not amplified.

Table S2. Historical and mutational parameters used in the coalescent simulations analysis.

Parameter	Prior distribution	
	Type	Initial-Final interval
Ne	Uniform	200,000 - 450,000
t1	Uniform	1300000 - 1600000
t2	Uniform	1700000 - 2100000
t3	Uniform	2000000 - 2600000
Mean mutation rate	Uniform	1.00E-8 - 5.00E-8
