

Figure S4.

Immunofluorescence assay (IFA) labeling of CpPGM1A and CpPGM1B in sporozoites (A) and intracellular parasites (B). Samples were fixed with cold methanol. **DIC**, differential phase contrast microscopy; **DAPI**, 4,6-diamidino-2-phenylindole (for counter-staining nuclei); **Alexa Fluor 488**, fluorophore used for IFA-labeling of CpPGM1A or CpPGM1B protein
