

Table S1. Taxonomic reclassification of the *Bartonella* species based on the 95% cut-off point assessed by the Average Nucleotide Identity (ANI) value. *Bartonella* species with a new proposed taxonomic status are red-marked. n/a: species that did not have ANI variation below the 97% cut-off.

Species on Genbank	Strain	Accession number	Lineage (based Subcluste		New proposed classification
			on cut off = 95%)	r (cut off = 97%)
