Note. The pathological changes of the lung on a scale: 0 - absence of pathology; 1- mild lesions; 2 - moderately lesions; 3 – pronounced lesions [1]. Mock-infected (2 hamsters), SARS-CoV-2, HAdV-5, IAV, SARS-CoV-2/HAdV-5, HAdV-5/3 day/ SARS-CoV-2, IAV/SARS-CoV-2 (3 hamsters). Three evenly distributed sections from each lung were scored for various parameters.
