
Supplementary Material

1 Length distribution of combined sequences

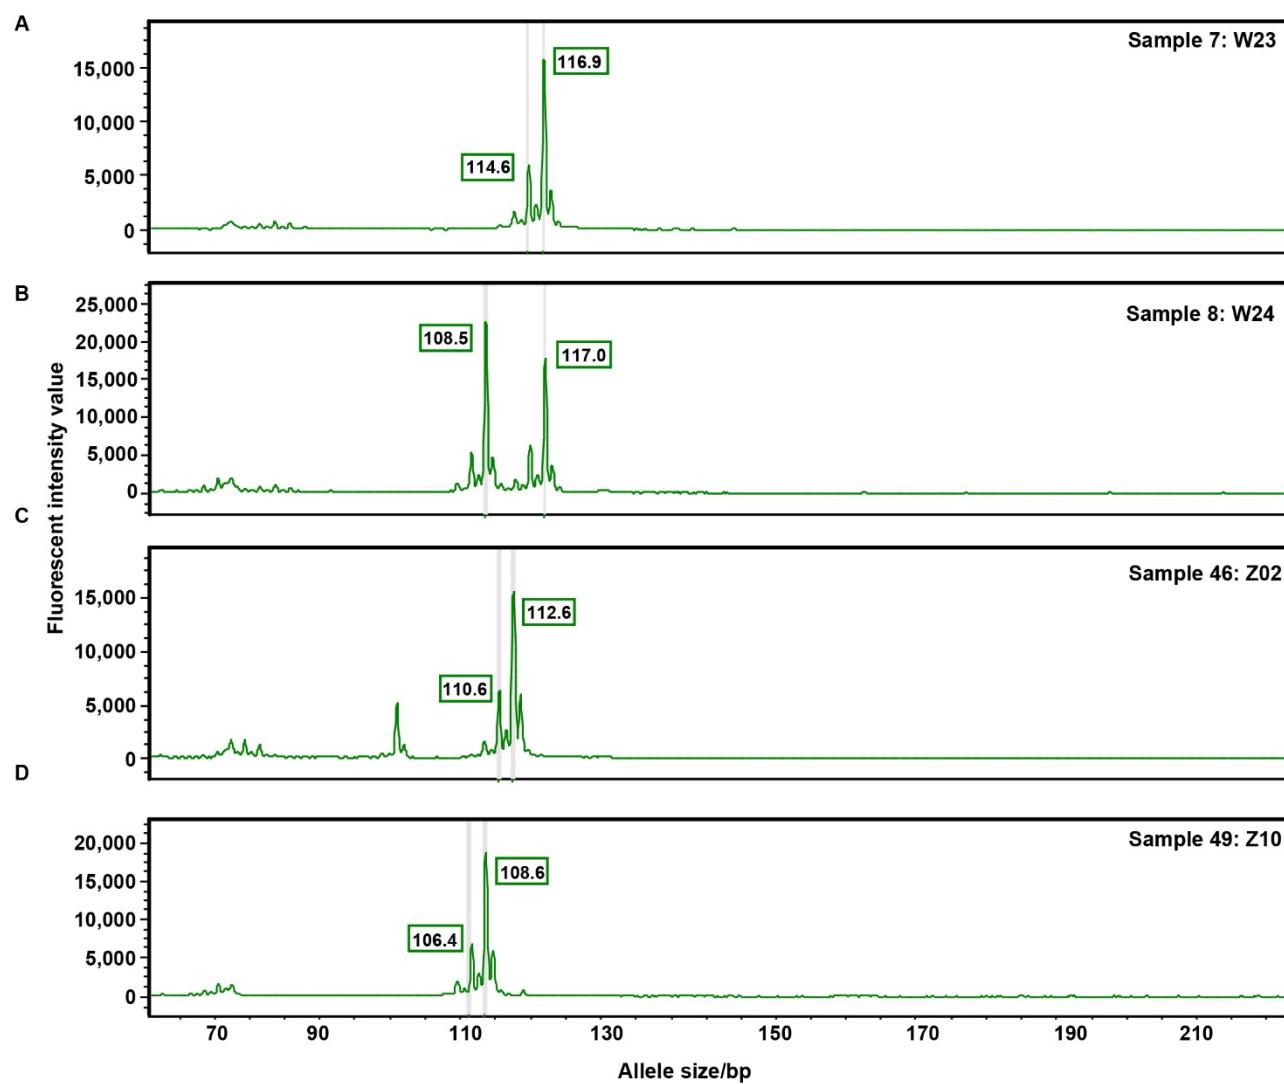

Supplementary Figure S1. Length distribution of combined sequences in four datasets. The X axis represents length of combined sequences, Y axis represents frequency of combined sequence with corresponding length in each dataset. Wuzhishan (WZS), inbred Luchuan (LC), Bama (BM) , and Zangxiang (ZX).

2 Frequency statistics of start position of repeat units at combined sequences

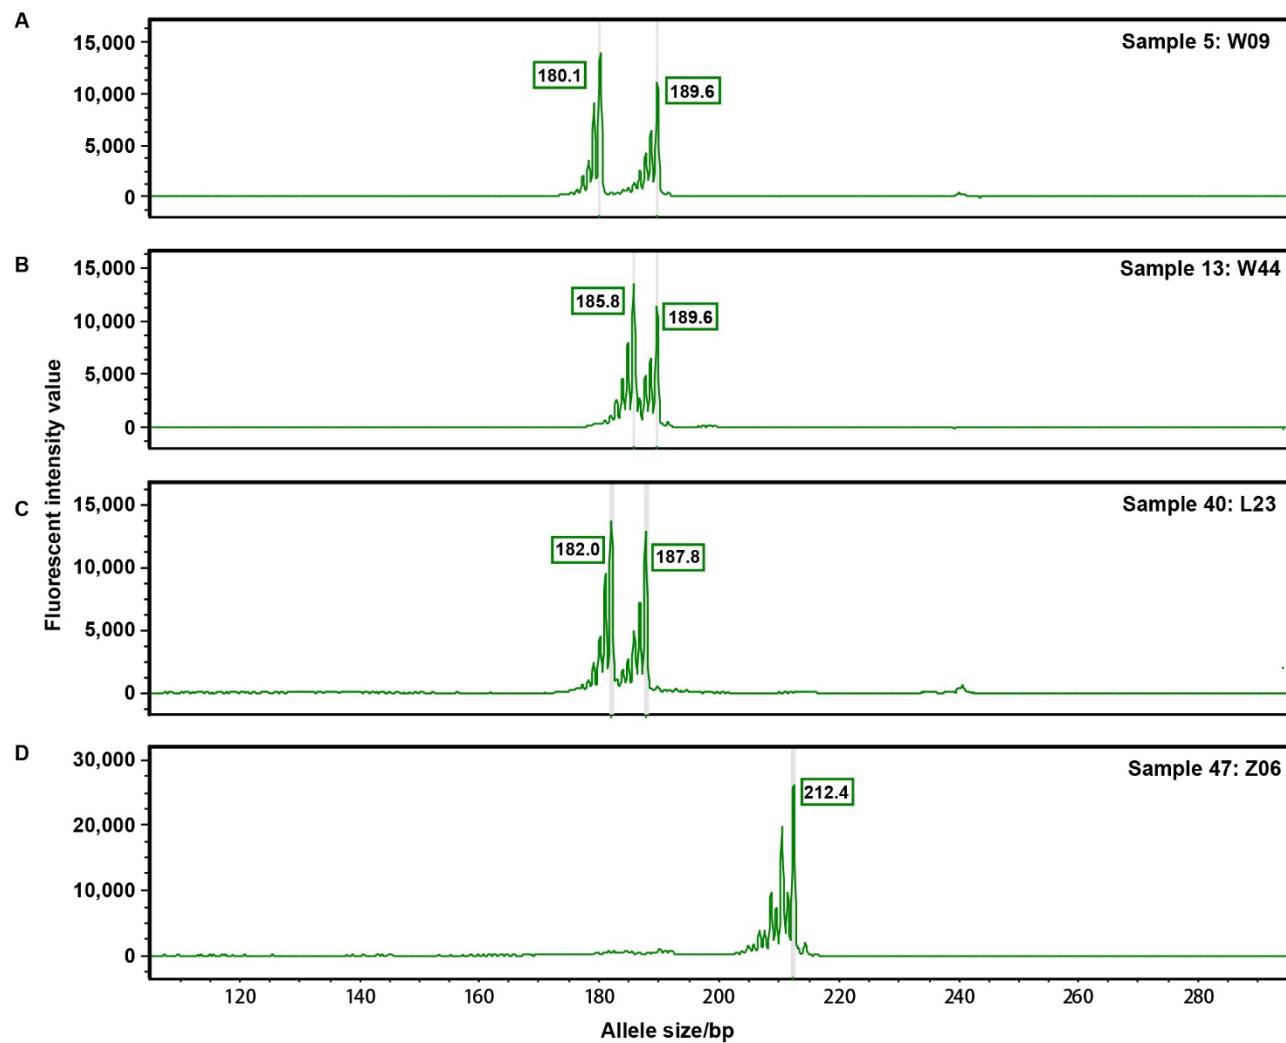

Supplementary Figure S2. Start position of repeat units at combined sequences for data of four breeds. The X axis means position of combined sequences, Y axis means frequency of repeat units at corresponding position in each dataset. Wuzhishan (WZS), inbred Luchuan (LC), Bama (BM) , and Zangxiang (ZX).

3 Alleles of SSR located in chr11:70,376,652-70,376,765

Supplementary Figure S3. Different alleles of SSR located in chr11:70,376,652-70,376,765. The output data from capillary electrophoresis was analyzed by GeneMapper software (V2.2.0) and generated the allele report for 60 pigs. (A-D) Six alleles 107, 109, 111, 113, 115 and 117 bp in length existed in chr11:70,376,652-70,376,765 bp are exemplified in corresponding pig individuals. The X axis represents allele size, Y axis represents fluorescent intensity for different allele size. The sample number W23 and W24 mean the individuals in Wuzhishan pig breed. The sample number Z02 and Z10 mean the individuals in Zangxiang pig breed.

4 Alleles of SSR located in chr18:1,858,964-1,859,153

Supplementary Figure S4. Different alleles of SSR located in chr18:1,858,964-1,859,153. The output data from capillary electrophoresis was analyzed by GeneMapper software (V2.2.0) and generated the allele report for 60 pigs. (A-D) Six alleles 180, 182, 186, 188, 190 and 212 bp in length existed in chr18:1,858,964-1,859,153 bp are exemplified in corresponding pig individuals. The X axis represents allele size, Y axis represents fluorescent intensity for different allele size, one and two peaks on the green line represents homozygosity and heterozygosity, respectively. The sample number W09 and W44 mean the individuals in Wuzhishan pig breed. The sample number L23 and Z06 mean the individual in inbred Luchuan and Zangxiang pig breed, respectively.

5 Statistic of SSRs in pig reference genome (*Sus Scrofa 11.1*)

Types	Counts	Percentage in total SSRs (%)	Length (bp)	Percentage in total length (%)
Di-SSRs	290,373	61.61	5,671,612	0.227
Tri-SSRs	82,517	17.51	1,540,512	0.062
Tetra-SSRs	83,936	17.81	2,394,808	0.096
Penta-SSRs	11,545	2.45	374,295	0.015
Hexa-SSRs	2,916	0.62	130,530	0.005
Total	471,287	100	10,111,757	0.404

Supplementary Table S1. Summary description of SSRs discovered in pig reference genome (*Sus Scrofa 11.1*).
