

Supplementary Material

Supplementary Table S1 Post Hoc Comparisons of sex-related differences in PPVT, EVT and RAN

Gender		Prior Odds	Posterior Odds	BF _{10, U}	error %
		a. PPVT			
Male	Female	1.000	0.830	0.830	0.010
		b. EVT			
Male	Female	1.000	0.265	0.265	0.011
		c. RAN			
Male	Female	1.000	0.265	0.265	0.011

Note. The posterior odds have been corrected for multiple testing by fixing the prior probability to 0.5 that the null hypothesis holds across all comparisons. Individual comparisons are based on the default t-test with a Cauchy (0, $r = 1/\sqrt{2}$) prior. The "U" in the Bayes factor denotes that it is uncorrected.

Supplementary Table S2 Bayesian Pearson Correlations (5-6 group)

Variable		RCPM	AS	VS	AVS	EHC	PPVT	EVT	RAN
