

A**SFM****B****CM DU145****C****CM PC3**

Supplementary Figure S3. Effects of on capillary-like structure formation of HUVECs by PCa supernatants. Morphogenesis assay on HUVECs pre-treated with 50 $\mu\text{g}/\text{mL}$ of CM collected from PCa cells following 24 h of treatment. Representative images of tubular structures with HUVEC exposed to (A) SFM, (B) CM from DU145 cells, (C) PC3 cells.
