

## Supplementary Data

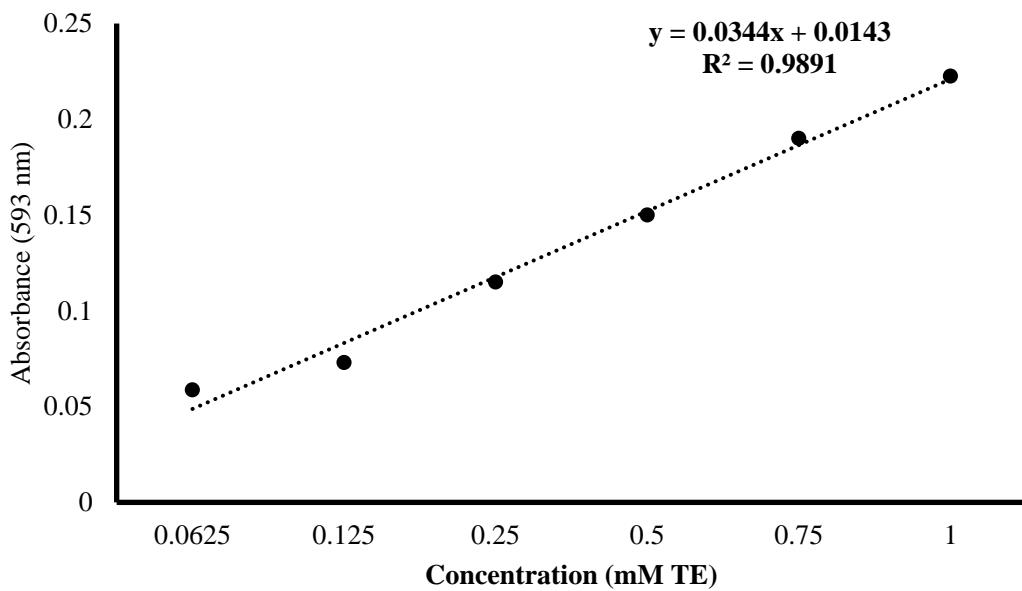

**Figure S1:** Total phenolic content standard curve using gallic acid solution (1 mM) as standard  
(GAE—gallic acid equivalents, mg—miligram, mL—mililiter, nm—nanometer,  
 $R^2$ —coefficient of variance)

## Supplementary Data

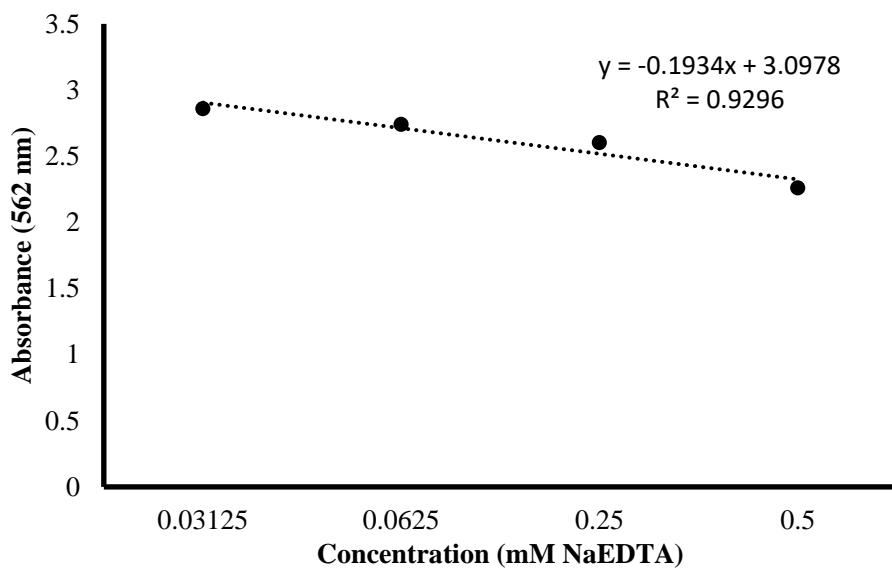

**Figure S2:** Total flavonoid content standard curve using quercetin solution (1 mM) as standard (QE—quercetin equivalents, nm—nanometer, mg—miligram, mL—mililiter,  $R^2$ —coefficient of variance)

## Supplementary Data

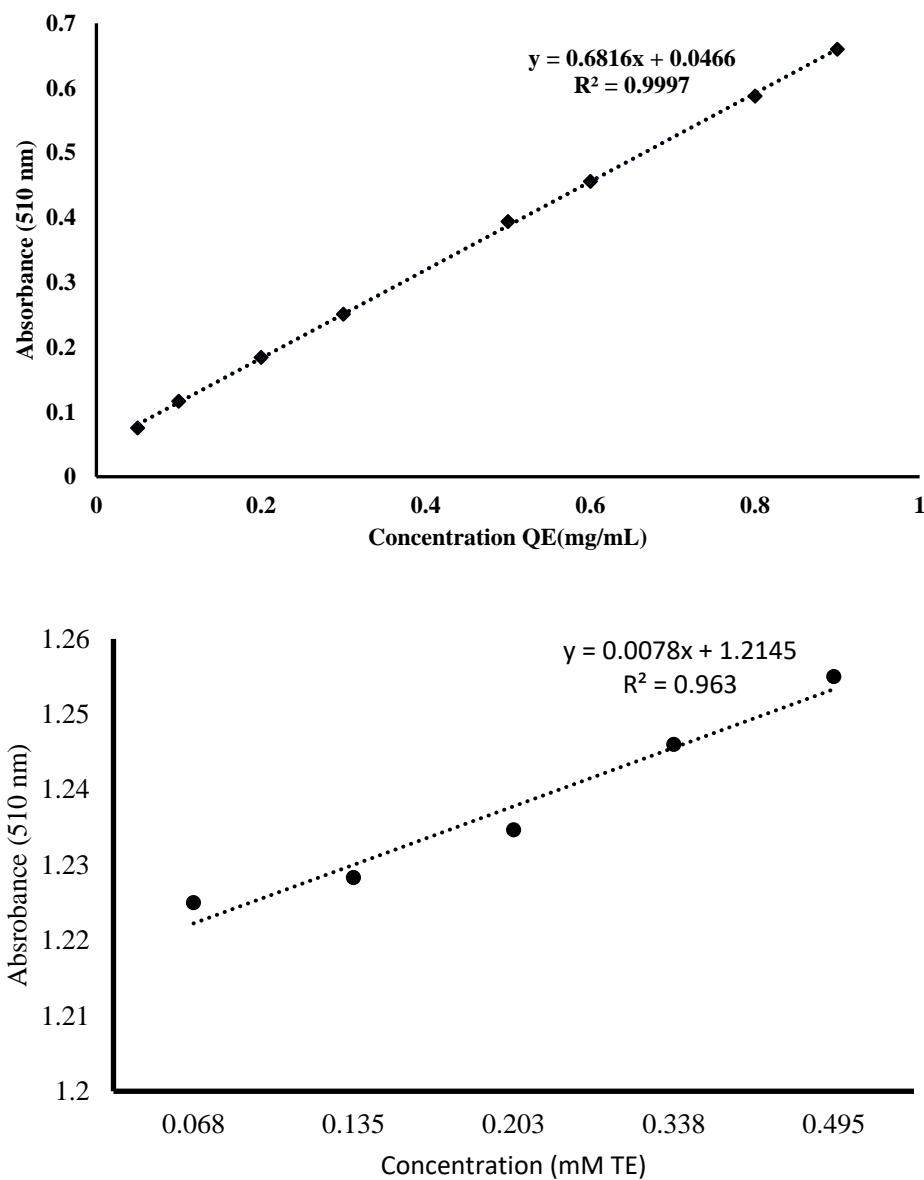

**Figure S3:** Standard curve for antioxidant activity by FRAP using trolox standard solution (1 mM) (TE—trolox equivalents, nm—nanometer, mg—miligram, mL—mililiter,  $R^2$ —coefficient of variance)

## Supplementary Data

**Figure S4:** Standard curve for antioxidant activity by metal ion chelating activity using Na<sub>2</sub>EDTA standard solution (EDTAE—EDTA equivalents, nm—nanometer, mg—milligram, mL—milliliter, R<sup>2</sup>—coefficient of variance)

## Supplementary Data

**Figure S5:** Standard curve for antioxidant activity by ABTS activity using trolox standard solution  
(TE—trolox equivalents, nm—nanometer, mg—miligram, mL—mililiter,  $R^2$ —  
coefficient of variance)
