## The Effect of Glutathione Peroxidase-1knockout on Anticancer Drug Sensitivities and the Accumulation of Reactive Oxygen Species in Hap-1 Human Cancer Cells

## **Supporting information**

Steven Behnisch-Cornwell, Lisa Wolff, Patrick J. Bednarski

## List of Figures:

Figure S1. Position of the frameshift mutation within the GPx1 gene.

Figure S2. Sequencing result of clone, mapped on NM\_000581.

**Figure S3.** Representative western blot of human GPx1 in various cell lines; corresponding signals in HAP-1 and KO.HAP-1.GPx1 cells are tagged. Positive GPx1 control was done with bovine GPx.

**Figure S4.** Representative dot plots from flow cytometric analysis of the Annexin V-FITC/PI Assay in untreated HAP-1 and KO.HAP-1.GPx1 cells determining background apoptosis.

Figure S5. Representative western blot of human GPx4 in HAP-1 and KO.HAP-1.GPx1 cells.

**Figure S6.** Representative western blot of human catalase in various cell lines; corresponding signals in HAP-1 and KO.HAP-1.GPx1 are tagged.

**Figure S7.** Representative western blot of Prx1 and Prx2 in HAP-1 and KO.HAP-1.GPx1 cells. **Figure S8.** Representative western blot of human Trx1 in HAP-1 and KO.HAP-1.GPx1 cells. **Figure S9.** Representative western blot of Trx2 in HAP-1 and KO.HAP-1.GPx1 cells. Guide RNA sequence: TAAGTAGTACCTTGCCCCGC Clone: 3261-10 Mutation: 38bp deletion in exon 1, causing frameshift

Figure s2. Sequencing result of clone, mapped on NM\_000581.

**Figure S3.** Representative western blot of GPx1 in various cancer cell lines. The corresponding lanes for HAP-1 and KO.HAP-1.GPx1 cells are tagged. Positive control was run with purified bovine GPx1.

**Figure S4.** Representative dot plots from flow cytometric analysis of the Annexin V-FITC/PI Assay in untreated HAP-1 and KO.HAP-1.GPx1 cells determining background apoptosis. Displayed on x-axis: relative fluorescence intensity of propidium iodide (PI). Displayed on y-axis: relative fluorescence intensity of fluorescein isothiocyanate (FITC). Analysis quadrants: **A**) viable cells (FITC/PI negative) **B**) early apoptotic cells (FITC positive/PI negative) **C**) late apoptotic cells (FITC/PI positive).

Figure S5. Representative western blot of GPx4 in HAP-1 and KO.HAP-1.GPx1 cells.
