The journal retracts the article “Platypnea-Orthodeoxia Syndrome: Multiple Pathophysiological Interpretations of a Clinical Picture Primarily Consisting of Orthostatic Dyspnea” by De Vecchis, R., et al. [1].

Following publication, concerns were brought to the attention of the publisher regarding an alleged redundant publication with “Platypnea-orthodeoxia Syndrome: Orthostatic Dyspnea and Possible Pathophysiological Substrates” by De Vecchis, R., et al. [2].

Adhering to our complaints procedure, an investigation was conducted that confirmed the existence of a redundant publication and the article is therefore retracted.

This retraction was approved by the Editor-in-Chief of Journal of Clinical Medicine. The authors agreed to this retraction.
