Genetics and epigenetics search strategy: When searching the literature an advanced search was conducted in PubMed using the full search-terms listed below for 'pain' AND 'surgery or trauma' AND ('infant' OR 'children and adolescents') AND 'genetics and epigenetics'. Only those infant studies which analyzed the epigenetic changes years after the initial skin-breaks in the NICU were kept in this summary figure (see text for more findings). When searching the literature for 'children and adolescent' findings, only those studies which included a chronic aspect of pain were kept. **FULL SEARCH TERMS- Pain:** ("pain"[Title/Abstract] OR "nocicepti*" [Title/Abstract] OR "CPSP"[Title/Abstract] OR "PPSP"[Title/Abstract] OR "skin-break"[Title/Abstract]) AND ("surger*" [Title/Abstract] OR "surgical*" [Title/Abstract] OR "trauma*" [Title/Abstract] OR "procedur*" [Title/Abstract] OR "postsurg*" [Title/Abstract] OR "post-surg*" [Title/Abstract] OR "postoperative"[Title/Abstract] OR "post-operative"[Title/Abstract] OR "perioperative"[Title/Abstract] OR "peri-operative"[Title/Abstract]). **Children and Adolescents:** ("toddler*" [Title/Abstract] OR "neonat*" [Title/Abstract] OR "pediatric*" [Title/Abstract] OR "prepubertal" [Title/Abstract] OR "adolescenc*" [Title/Abstract] OR "teenage*" [Title/Abstract] OR "teen*" [Title/Abstract] OR "youth*" [Title/Abstract]). **Infants:** ("infant*" [Title/Abstract] OR "newborn*" [Title/Abstract] OR "neonat*" [Title/Abstract] OR "preterm" [Title/Abstract] OR "prenatal*" [Title/Abstract] OR "prematu*" [Title/Abstract] OR "premie*" [Title/Abstract]). **Epigenetics and genetics:** "epigenetic*" [Title/Abstract] OR "epigenom*" [Title/Abstract] OR "microRNA*" [Title/Abstract] OR "miRNA*" [Title/Abstract] OR "histone-acetylation" [Title/Abstract] OR "histone-methylation" [Title/Abstract] OR "DNA-methylation" [Title/Abstract] OR "5'-C-phosphate-G-3'" [Title/Abstract] OR "CpG" [Title/Abstract] OR "CpGs" [Title/Abstract] OR "CGI" [Title/Abstract] OR "CGIs" [Title/Abstract] OR "chromatin" [Title/Abstract] OR "CpG-island-methylator-phenotype" [Title/Abstract] OR "CIMP*" [Title/Abstract] OR "methyltransferase*" [Title/Abstract] OR "meQTL*" [Title/Abstract] OR "methylation-quantitative-trait-loci" [Title/Abstract] OR "chromatin-accessibility" [Title/Abstract] OR "chromatin-modification*" [Title/Abstract] OR "GWAS" [Title/Abstract] OR "genome-wide-association-stud*" [Title/Abstract] OR "genetic*" [Title/Abstract] OR "genomic*" [Title/Abstract] OR "gene" [Title/Abstract] OR "transcriptome*" [Title/Abstract] OR "transcription*" [Title/Abstract] OR "mRNA" [Title/Abstract] OR "RNA" [Title/Abstract] OR "DNA" [Title/Abstract] OR "SNP*" [Title/Abstract] OR "single-nucleotide-polymorphism*" [Title/Abstract] OR "eQTL" [Title/Abstract] OR "expression-

quantitative-trait-loci"[Title/Abstract] OR "polygenic-risk-score"[Title/Abstract] OR "methylation-risk-score"[Title/Abstract].
