Unadjusted survival plots for different drug classes

Supplementary Figure S4A:

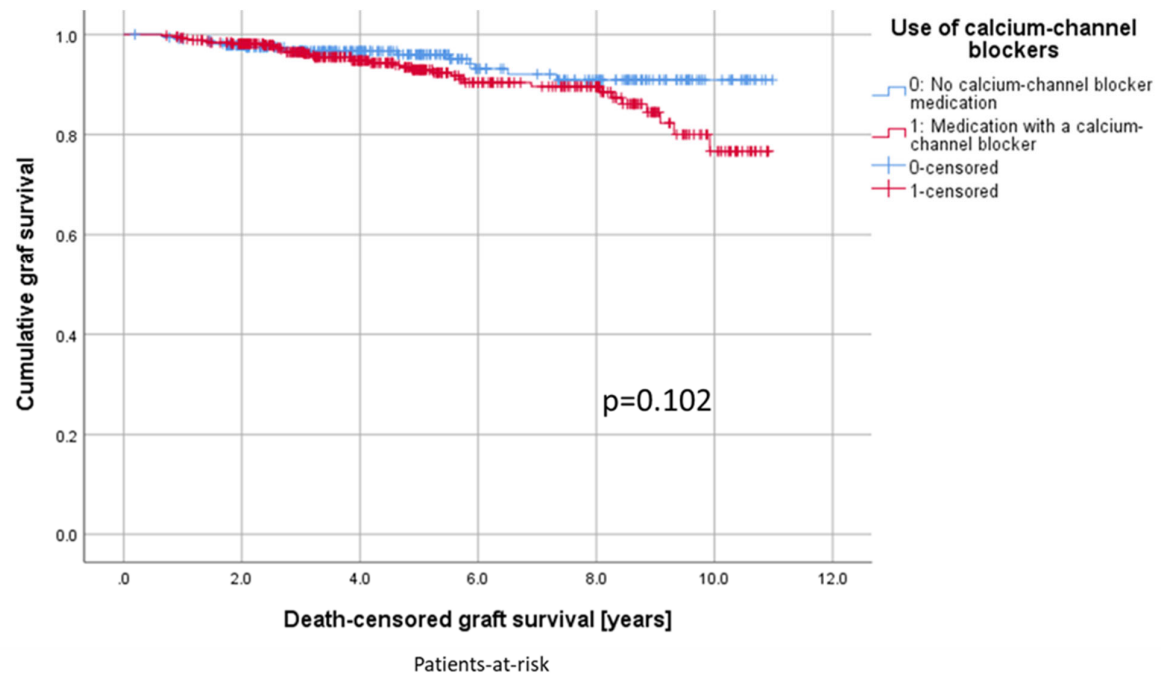

Supplementary Figure S4B:

Supplementary Figure S4C:

Supplementary Figure S4D:

Suppl. Figure 4: Patients treated with beta-blockers show unfavorable death-censored graft survival compared to those without, Log-rank test, $p=0.022$ (A). Those treated with loop diuretics also show unfavorable death-censored graft survival compared to those without, Log-rank test, $p=0.001$ (B). In contrast, the use of ACE-I/ARBs does not influence death censored allograft survival, Log-rank test, $p=0.398$ (C). Likewise, there is no difference in the death-censored allograft survival between patients with and without CCB medication, Log-rank test, $p=0.102$ (D)
