

Supplementary Materials

Future projection for climate suitability of summer maize in the North China Plain

Yanxi Zhao¹, Dengpan Xiao¹, Huizi Bai¹, Jianzhao Tang¹, De Li Liu²

Contents:

Figure S1. The spatial distribution of the change of maize climate suitability for the vegetative growth pe-riod (a,d,g,j), reproductive growth period (b,e,h,k) and whole growth period (c,f,i,l) under SSP245 during 2040s compared to the baseline period (1980–2010) in the NCP

Figure S2. The spatial distribution of the change of maize climate suitability for the vegetative growth pe-riod (a,d,g,j), reproductive growth period (b,e,h,k) and whole growth period (c,f,i,l) under SSP245 during 2080s compared to the baseline period (1980–2010) in the NCP

Figure S3. The simulated flowering date (a) and maturity date (b) of maize for different sowing dates in the NCP during 2040s and 2080s under SSP245 and SSP585

Figure S4. The simulated changes of flowering date and maturity date across the North China Plain during 2040s and 2080s under SSP245 and SSP585 compared to the baseline (1981–2010)
