Supplementary Materials:

Fig. S1. The images of the HA scaffold with different shape. (A, B and C), HA scaffolds with different shape; (D), HA scaffolds with different height; (E, F), side and front view of HA scaffold.

Fig. S2. FE-SEM results of the HA scaffold. (A), fracture surface structure; (B), surface structure of front view and (C) surface topography.

Fig. S3. XRD (A) and EDS (B) results of the HA scaffold.

Fig. S4. FE-SEM images about Fracture surface morphology of the HA hexagon-like microarray with different Sr²⁺-substituted contents topographies on the HA scaffold surface.

Fig. S5. EDS images of the HA hexagon-like microarray with different Sr²⁺-substituted contents topographies on the HA scaffold surface. (the EDS Mapping results were just qualitative and the Sr ions substituted amount in the whole HA scaffold is handful compared with other ions, so the system also would show some lightspots even on the scaffold with no Sr ions substituted)

Fig. S6 Relative expression of marker proteins related to osteogenic differentiation of ADSCs on the Sr^{2+} -substituted HA hexagon-like microarray topography of HA scaffolds surface for (A) 7, (B) 14 days, as measured by western blot.

Target Gene	Direction	Sequence (5'-3')	
GADPH	Forward	TGGATGGCCCCTCCGGGAAA	
	Reverse	AGTGGGGACACGGAAGGCCA	
ALP	Forward	CACTGGCGGTGCAACAAGA	
	Reverse	GAGACCCAATAGGTAGTCCACATTG	
BMP2	Forward	AACACTGTGCGCAGCTTCC	
	Reverse	CTCCGGGTTGTTTTCCCAC	
RUNX2	Forward	CACTGGCGGTGCAACAAGA	
	Reverse	CATTCCGGAGCTCAGCAGAATAA	
OCN	Forward	CAGCGAGGTAGTGAAGAGA	
	Reverse	GACTGGTGTAGCCGAAAG	
Osterix	Forward	GCCATTCTGGGCTTGGGTA	
	Reverse	TGTGGCAGGGCCAGAGTCTA	
VEGF	Forward	TATTCAGCGGACTCACCAGC	
	Reverse	CCTCCTCAAACCGTTGGC	

Table S1. The primers for osteogenic related genes.

HA scaffold	$M_{(\text{Ca+Sr})/\text{P}} \ value$	Msr/(Ca+Sr) value (%)
0Sr-HA	1.62	0.00
1Sr-HA	1.49	0.47
4Sr-HA	1.62	2.97
8Sr-HA	1.72	4.99

 $\label{eq:table_state} \textbf{Table S2.} The \ M_{(Ca+Sr)/P} \ and \ M_{Sr/(Ca+Sr)} \ value \ of \ HA \ scaffolds \ with \ different \ Sr^{2+}-substituted \ contents \ by \ EDS \ analysis.$

Table S3. The lattice constant of HA scaffolds with different Sr²⁺-substituted contents.

HA scaffold	a (Å)	c (Å)	Volume (nm ³)
0Sr-HA	9.41304	6.87464	1.61913
1Sr-HA	9.41366	6.87515	1.61940
4Sr-HA	9.41687	6.88372	1.62252
8Sr-HA	9.42023	6.88035	1.62289
