This file supplementary Table S1-3.

**Table S1.** Properties of water and ethanol for CFD calculation from the engineering database (Solid-works).

Properties of water			
Density	Dynamic viscosity	Specific heat (Cp)	Thermal conductivity
Properties of ethanol			
Density	Dynamic viscosity	Specific heat (Cp)	Thermal conductivity

**Table S2.** Difference mesh refinement of the automating generated mesh in seven levels.

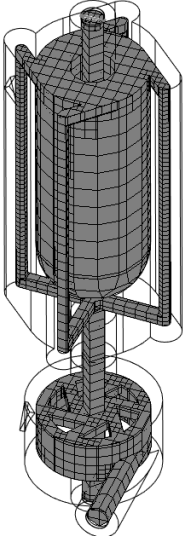

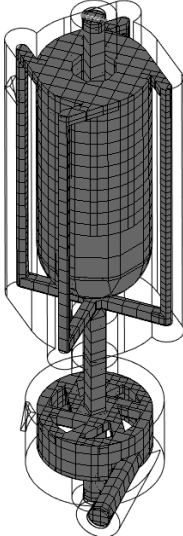

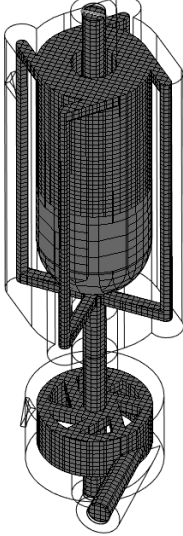

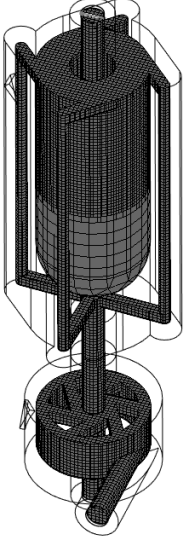

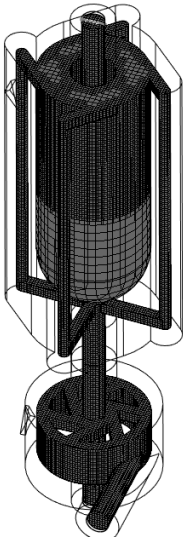

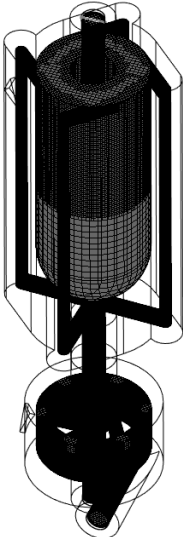

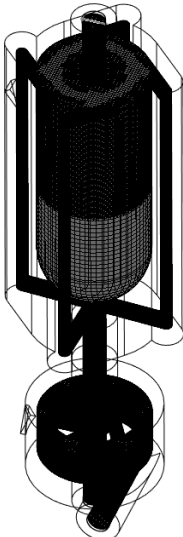

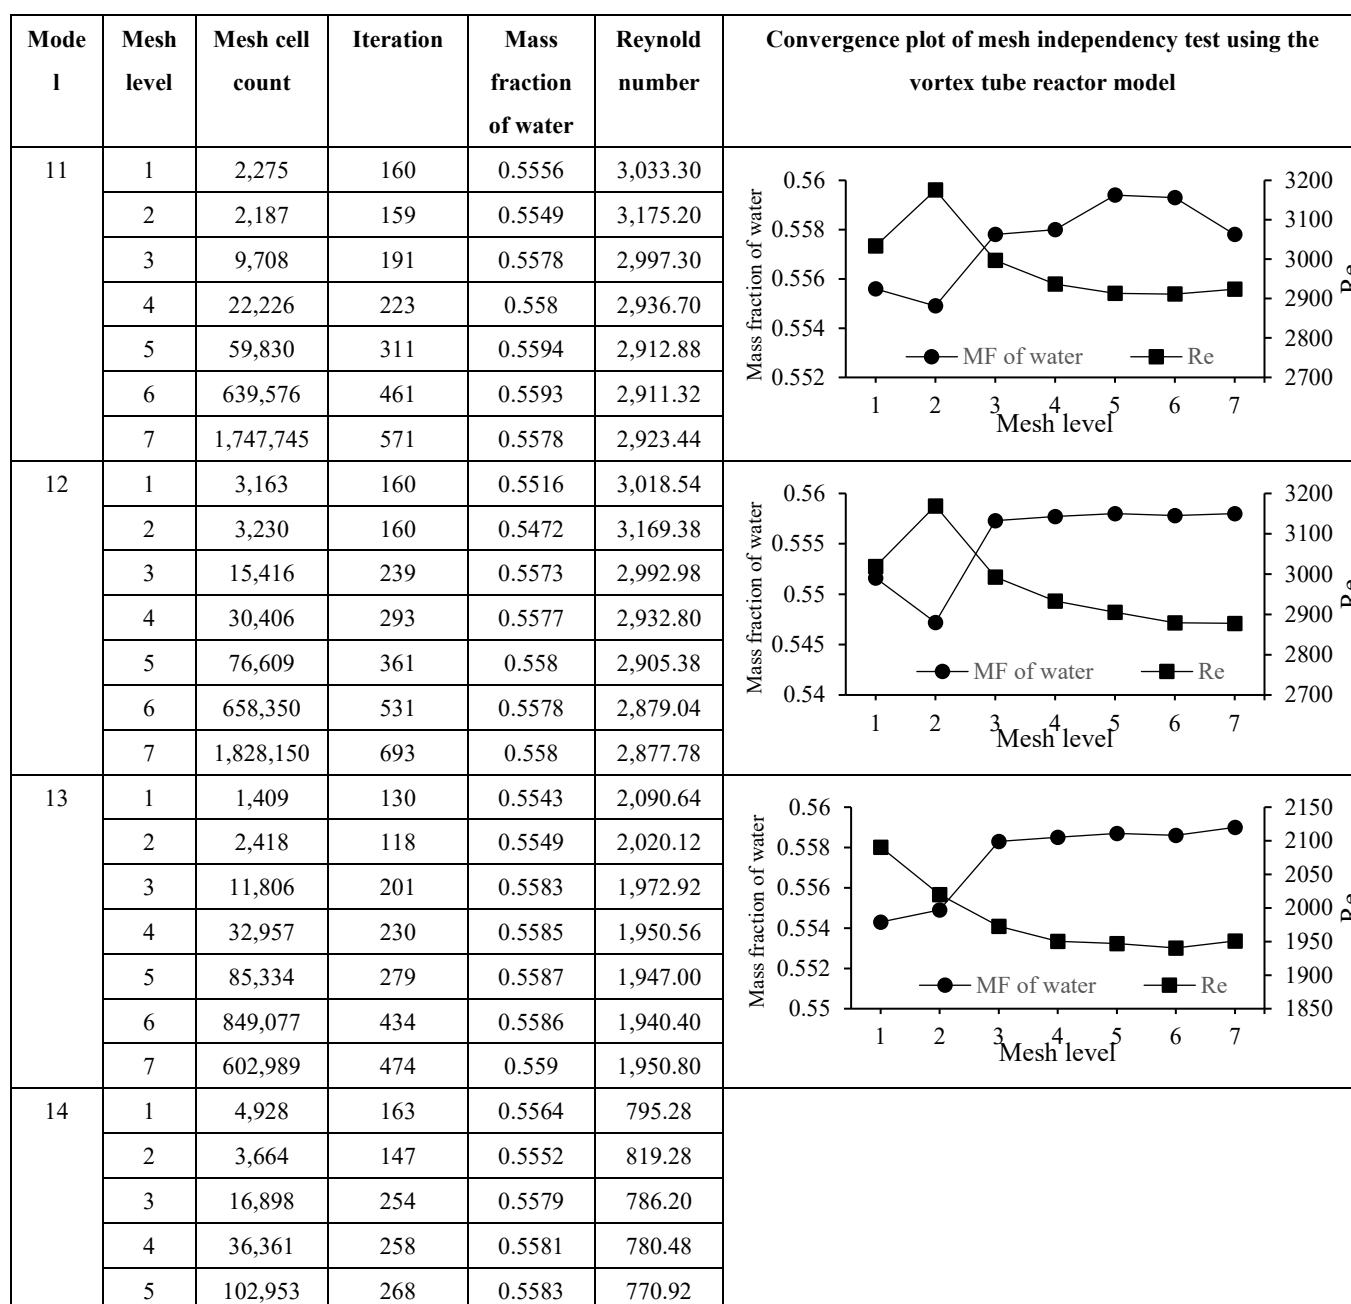

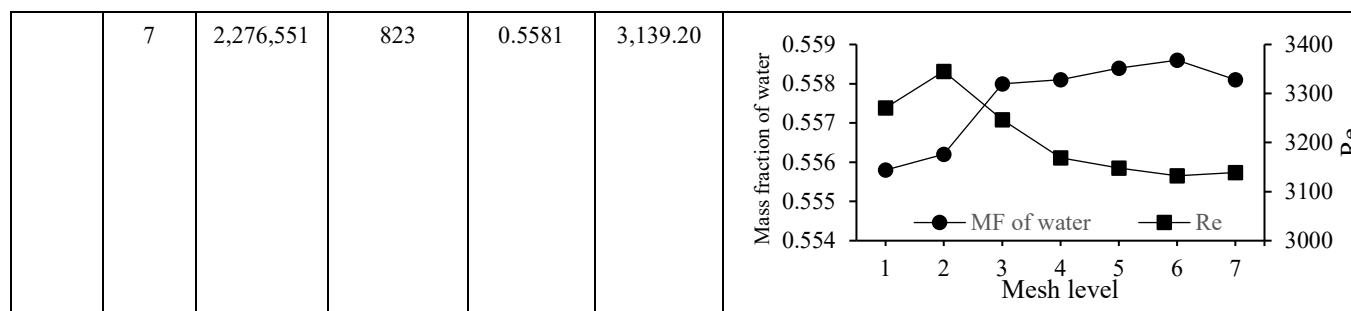

Mesh refinement			
Level 1	Level 2	Level 3	Level 4
			
Level 5	Level 6	Level 7	
			

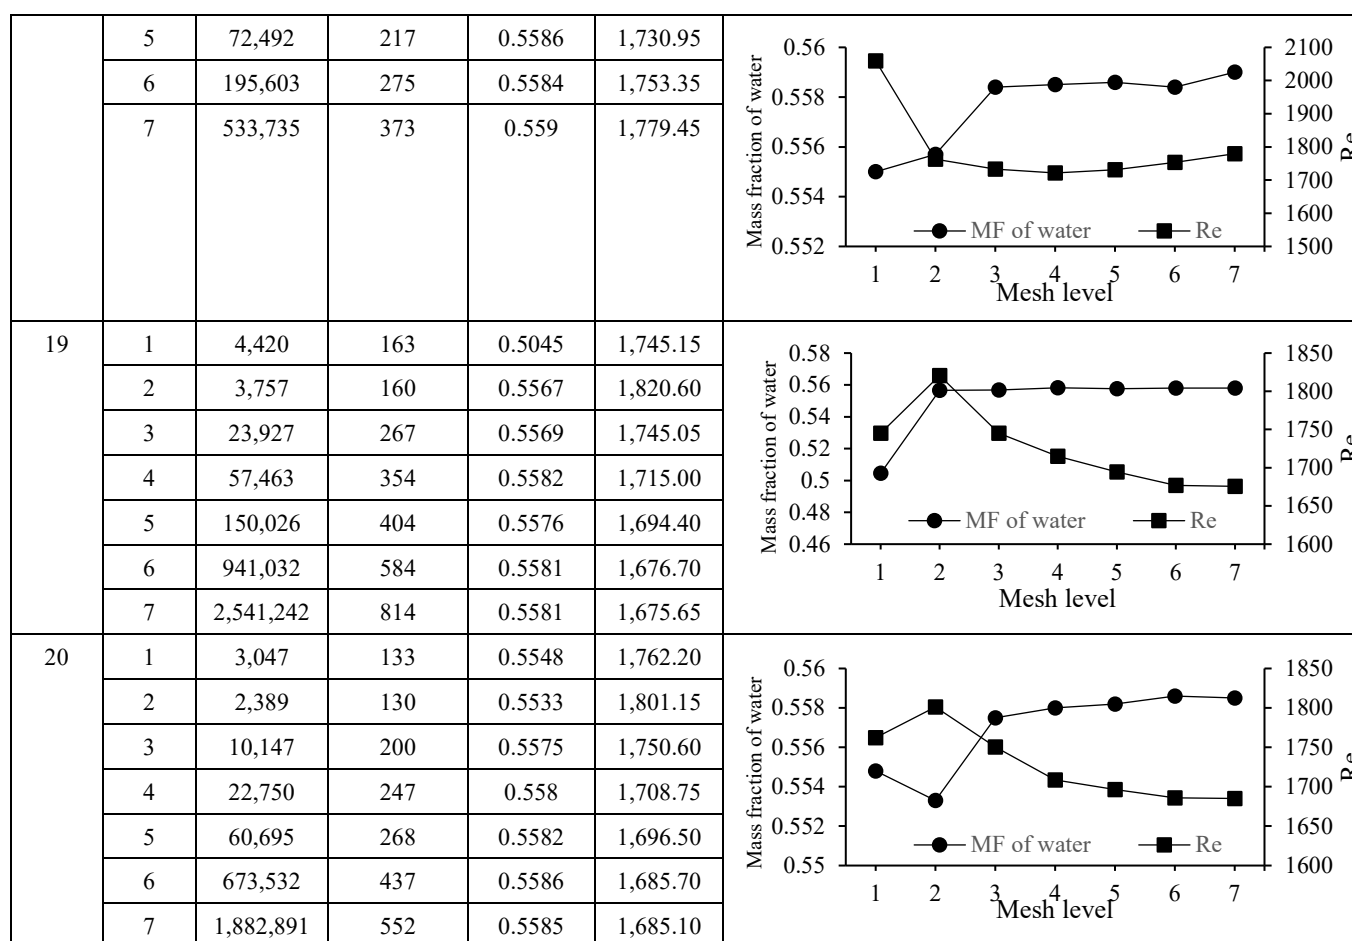

Table S3. Mesh independency test using the vortex tube reactor model.

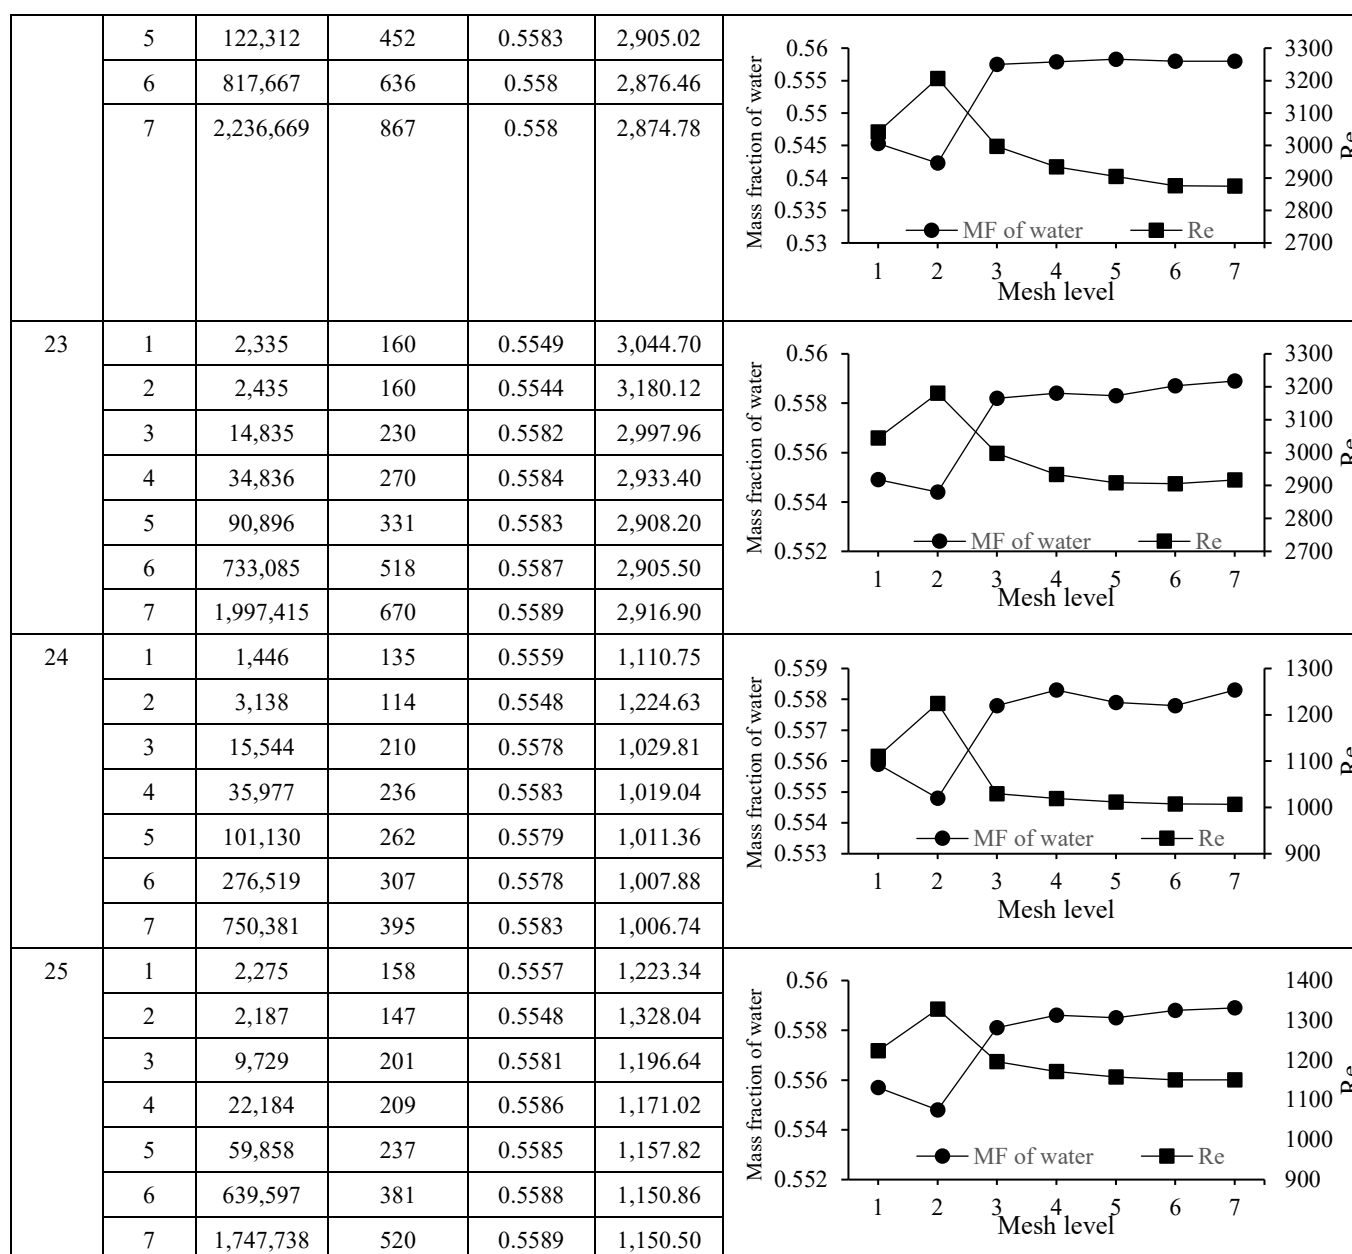

Mode l	Mesh level	Mesh cell count	Iteration	Mass fraction of water	Reynold number	Convergence plot of mesh independency test using the vortex tube reactor model
1	1	3,268	160	0.5495	1,117.56	<p>Mass fraction of water</p> <p>Mesh level</p> <p>MF of water</p> <p>Re</p>
	2	3,558	160	0.5488	1,192.62
