Index

Figure S1 Guanabara Bay sampling sites (green dots). Site 1 is located in the proximity of the Atlantic Ocean and is one of the least impacted sites. Site 7 is considered the intermediate site and site 34 is located in the inner part of the estuary, being considered one of the most ecologically impacted sites. Red markers indicate wastewater treatment plants.....2

Table S1 Primer sequences, cycling conditions and amplicon sizes of the antimicrobial resistance genes and the class 1 integron-integrase gene investigated in this study.....3

Table S2 Primer sequences, cycling conditions and amplicon sizes of the heavy metal resistance genes and the class 1 integron-integrase gene investigated in this study.....4
