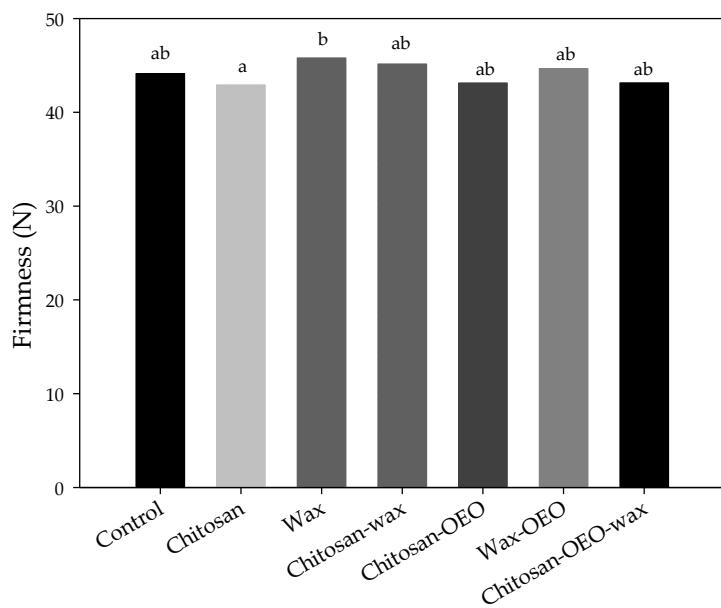

Figure S1. Global effect of chitosan, wax, chitosan-wax, chitosan-OEO, wax-OEO, and chitosan-OEO-wax coatings on the firmness of the cucumbers stored at 10 °C for 15 days. Values are means of  $n = 3$ . Different literals among treatments indicate significant differences ( $p \leq 0.05$ ).

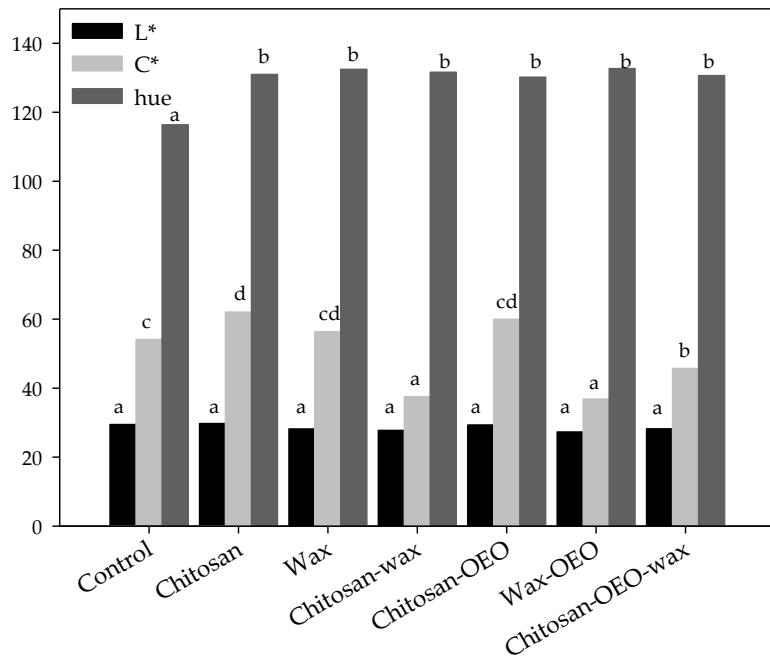

Figure S2. Global effect of chitosan, wax, chitosan-wax, chitosan-OEO, wax-OEO, and chitosan-OEO-wax coatings on the surface color of cucumbers stored at 10 °C for 15 days. Values are means of  $n = 3$ . Different literals among treatments in the same parameter indicate significant differences ( $p \leq 0.05$ ).
