Figure S1. The result of 10 cycles of the CV test using the (a) Ag, (b) Ag/Au, (c) Au, and (d) Au/Ag thin films.

Figure S2. The results of the EIS tests on the various types of electrodes without the deposition of BSA.

Figure S3. (a) The results of the EIS test with varying concentrations on the Ag/Au thin film. (b) The R_{ct} values of the Ag, Au, Ag/Au and Au/Ag thin film with varying concentrations of BSA.
