Classification model for Diabetic foot, Necrotizing fasciitis, and Osteomyelitis

Jiye Kim[1,†], Gilsung Yoo[2,†], Taesic Lee[3,4,6], Jeong Ho Kim[1], Dong Min Seo[5], Juwon Kim[2, 6,*]

Table S1. References in the literature-based search for variables

Reference title	Author	Year	PMID	Feature*
The LRINEC (Laboratory Risk Indicator for Necrotizing Fasciitis) score: a tool for distinguishing necrotizing fasciitis from other soft tissue infections [1]	Wong CH, et al.	2004	15241098	CRP WBC Hb Na Cr Glucose
Early diagnosis of necrotizing fasciitis [2]	Goh T, et al.	2014	24338771	Presence of bullae Gas on plain X-ray
Risk factors associated with necrotizing fasciitis of the lower limbs: A multicenter case-control study [3]	Pitché P, et al.	2021	33558036	Obesity Nicotine addiction Use of NSAIDs Voluntary cosmetic depigmentation
Hepatitis C viral infection as an associated risk factor for necrotizing fasciitis [4]	Scher D, et al.	2012	22495851	HCV infection
Modified Laboratory Risk Indicator for Necrotizing Fasciitis (m-LRINEC) Score System in Diagnosing Necrotizing Fasciitis: A Nested Case-Control Study [5]	Wu H, et al.	2021	34113137	Kidney diseae
Usefulness of serum procalcitonin for necrotizing fasciitis as an early diagnostic tool [6]	Kishino T, et al.	2021	33454216	Procalcitonin
The infected diabetic foot: Can serum biomarkers predict osteomyelitis after hospital discharge for diabetic foot	Crisologo PA, et al.	2020	32698253	ESR IL-8

infections? [7]				IL-6 MCP-1
Utility of modified Laboratory Risk Indicator for Necrotizing Fasciitis (MLRINEC) score in distinguishing necrotizing from non-necrotizing soft tissue infections [8]	Wu PH, et al.	2021	34039397	Lactate Liver disease
Clinical, microbiological and inflammatory markers of severe diabetic foot infections [9]	Aragón-Sánchez J, et al.	2021	34270826	Skin necrosis Albumin NLR
Laboratory indicators for early detection and surgical treatment of vibrio necrotizing fasciitis [10]	Tsai YH, et al.	2010	20232179	Platelet Band form leukocyte
The SIARI Score: A Novel Decision Support Tool Outperforms LRINEC Score in Necrotizing Fasciiti [11]*s*	Benjamin I Cribb, et al.	2019	31214830	Site other than lower limb History of immunosuppression Age
Accurate and quick predictor of necrotizing soft tissue infection: Usefulness of the LRINEC score and NSTI assessment score [12]	Harasawa T, et al.	2020	31711831	Mean arterial pressure
Pentraxin-3: A new parameter in predicting the severity of diabetic foot infection? [13]	Ozer Balin S, et al.	2019	30767386	Pentraxin-3
Combined clinical and laboratory testing improves diagnostic accuracy for osteomyelitis in the diabetic foot [14]	Fleischer AE, et al.	2009	19110158	Ulcer depth > 3mm

*Once a feature was introduced in reference, duplicated one in other reference was omitted.
