

Supplementary Information

Genetic Diversity and Connectivity of *Ocypode ceratophthalmus* in the East and South China Seas and Its implications for conservation

Feng Zhao, Yue Liu , Zihan Wang, Jiaying Lu, Ling Cao, and Cong Zeng *

School of Oceanography, Shanghai Jiao Tong University, Shanghai 200030, China

* Correspondence: congzeng@sjtu.edu.cn

Table S1. Current status of genetic connectivity between populations in the East China Sea and populations in the South China Sea. The Web of science and CNKI were used to search the published papers. ((genetic OR gene) AND (" East China Sea" AND "South China Sea ")) were used as search keywords for English articles, and ("East China Sea", "South China Sea" and "genetic") (in Chinese) were used as search keywords for Chinese articles. The search deadline was December 29, 2022. Only articles in which the studies species had sampling sites in the East China Sea and the South China Sea were retained. A case was considered to have significant genetic differentiation if there was at least one significant value of the fixation index (F_{ST}) between populations in the East China Sea and populations in the South China Sea.

ID	Species	Genetic marker	Genetic differentiation	Number of populations	Reference
1	<i>Pampus chinensis</i>	COI	Yes	6	Population genetic structure and genetic diversity of Chinese pomfret at the coast of the East China Sea and the South China Sea
2	<i>Pagrus major</i>	SSR	Yes	2	Genetic Structure of Red Sea Bream (<i>Pagrus major</i>) Population off Japan and the Southwest Pacific, Using Microsatellite DNA Markers
3	<i>Eleutheronema tetradactylum</i>	Cytb	Yes	4	Low mtDNA <i>Cytb</i> diversity and shallow population structure of <i>Eleutheronema tetradactylum</i> in the East China Sea and the South China Sea
4	<i>Thamnaconus hypargyreus</i>	D-Loop	No	5	Shallow mitochondrial phylogeographical pattern and high levels of genetic connectivity of <i>Thamnaconus hypargyreus</i> in the South China Sea and the East China Sea
5	<i>Eleutheronema rhadinum</i>	COI	No	2	Genetic diversity and population structure of <i>Eleutheronema rhadinum</i> in the East and South China Seas revealed in mitochondrial COI sequences
6	<i>Nibea albiflora</i>	COI	No	3	Genetic diversity and population structure of <i>Nibea albiflora</i> in the

7	<i>Epinephelus akaara</i>	D-Loop	Yes	6	China Sea revealed by mitochondrial <i>COI</i> sequences	
8	<i>Scomber japonicus</i>	SSR	Yes	6	Genetic population structuring and demographic history of red spotted grouper (<i>Epinephelus akaara</i>) in South and East China Sea	
9	<i>Chelon haematocheilus</i>	D-Loop	Yes	3	Microsatellite analysis reveals the population structure and migration patterns of <i>Scomber japonicus</i> (Scombridae) with continuous distribution in the East and South China Seas	
10	<i>Eriocheir sensu stricto</i>	AFLP	Yes	7	Pleistocene isolation in the Northwestern Pacific marginal seas and limited dispersal in a marine fish, <i>Chelon haematocheilus</i> (Temminck & Schlegel, 1845)	
11	<i>Portunus sanguinolentus</i>	D-Loop	Yes	6	Genome scan of the mitten crab <i>Eriocheir sensu stricto</i> in East Asia: Population differentiation, hybridization and adaptive speciation	
12	<i>Scylla parammosain</i>	<i>COI+16S rDNA</i>	Yes	10	Phylogeography and Genetic Structure of the Swimming Crabs <i>Portunus sanguinolentus</i> (Herbst, 1783) in East Asia	
13	<i>Liza affinis</i>	SSR	Yes	8	Late Pleistocene population expansion of <i>Scylla parammosain</i> along the coast of China: A population dynamic response to the Last Interglacial sea level highstand	
14	<i>Periophthalmus modestus</i>	ND5	No	5	Population Genetic Structure of <i>Liza affinis</i> (Eastern Keelback Mullet), Reveals High Gene Flow Inferred from Microsatellite Analysis	
15	<i>Platyplectron hilpa</i>	<i>COI+COII+ Cytb</i>	Yes	24	Biogeographical role of the Kuroshio Current in the amphibious mudskipper <i>Periophthalmus modestus</i> indicated by mitochondrial DNA data	
16	<i>Atrina pectinata</i>	<i>COI</i>	No	10	Phylogeography of the cicada <i>Platyplectron hilpa</i> in subtropical and tropical East Asia based on mitochondrial and nuclear genes and microsatellite markers	
17	<i>Siphonaria japonica</i>	<i>COI</i>	No	5	Population genetic structure of the pen shell <i>Atrina pectinata</i> sensu lato (Bivalvia: Pinnidae) throughout East Asia	
18	<i>Siphonaria japonica</i>	<i>ITS</i>	No	5	Causations of phylogeographic barrier of some rocky shore species along the Chinese coastline	
					Causations of phylogeographic barrier of some rocky shore species along the Chinese coastline	

19	<i>Macrobrachium nipponense</i>	<i>COI+16S rRNA</i>	Yes	6	Phylogeography and genetic structure of the oriental river prawn <i>Macrobrachium nipponense</i> (Crustacea: Decapoda: Palaemonidae) in East Asia
20	<i>Cyclina sinensis</i>	<i>COI</i>	Yes	9	Phylogeography of Bivalve <i>Cyclina sinensis</i> : Testing the Historical Glaciations and Changjiang River Outflow Hypotheses in Northwestern Pacific
21	<i>Cyclina sinensis</i>	<i>ITS-1</i>	Yes	9	Phylogeography of Bivalve <i>Cyclina sinensis</i> : Testing the Historical Glaciations and Changjiang River Outflow Hypotheses in Northwestern Pacific
22	<i>Tachypleus tridentatus</i>	<i>AT-rich region</i>	Yes	8	Phylogeography, Demographic History, and Reserves Network of Horseshoe Crab, <i>Tachypleus tridentatus</i> , in the South and East China Seasboards
23	<i>Penaeus japonicus</i>	<i>COI</i>	Yes	5	Molecular population structure of the kuruma shrimp <i>Penaeus japonicus</i> species complex in western Pacific
24	<i>Penaeus japonicus</i>	<i>D-Loop</i>	Yes	5	Molecular population structure of the kuruma shrimp <i>Penaeus japonicus</i> species complex in western Pacific
25	<i>Penaeus japonicus</i>	<i>SSR</i>	No	5	Molecular population structure of the kuruma shrimp <i>Penaeus japonicus</i> species complex in western Pacific
26	<i>Eleutheronema rhadinum</i>	<i>COI</i>	Yes	4	Population genetic characteristics of <i>Eleutheronema rhadinum</i> and <i>Eleutheronema tetradactylus</i> in China (in Chinese)
27	<i>Eleutheronema rhadinum</i>	<i>D-Loop</i>	Yes	4	Population genetic characteristics of <i>Eleutheronema rhadinum</i> and <i>Eleutheronema tetradactylus</i> in China (in Chinese)
28	<i>Arcotheres sinensis</i>	<i>COI</i>	Yes	4	Morphological variation and population genetic structure of the crab <i>Arcotheres sinensis</i> from coastal China (in Chinese)
29	<i>Parasesarma affinis</i>	<i>COI</i>	No	12	Studies on molecular phylogeny of sesarmid crabs from the coast of China and molecular phylogeny of two mangrove crabs (in Chinese)
30	<i>Octopus oculum</i>	<i>Cyt b</i>	No	4	Analysis of genetic diversity and structure of octopuses (in Chinese)
31	<i>Sthenoteuthis oualaniensis</i>	<i>Cyt b</i>	Yes	2	Genetic structure of <i>Sthenoteuthis oualaniensis</i> population in the northwest Pacific ocean (in Chinese)
32	<i>Pagrus major</i>	<i>D-Loop</i>	Yes	9	Genetic diversity of 3 sparid species in coastal waters of China based on

					mitochondrial control region sequences (in Chinese)
33	<i>Acanthopagrus schlegeli</i>	D-Loop	Yes	11	Genetic diversity of 3 sparid species in coastal waters of China based on mitochondrial control region sequences (in Chinese)
34	<i>Rhabdosargus sarba</i>	D-Loop	Yes	6	Genetic diversity of 3 sparid species in coastal waters of China based on mitochondrial control region sequences (in Chinese)
35	<i>Ilisha elongata</i>	D-Loop	Yes	8	Population genetics of the <i>Ilisha elongata</i> (Clupeiformes: Pristigateridae) along the Northwestern Pacific coast and the development of SNP marker for <i>Ilisha elongata</i> and coilia nusus (in Chinese)
36	<i>Oratosquilla oratoria</i>	ND5+COI+ COB	Yes	6	Phylogeography of Manatosquilla shrimp populations and molecular phylogeny of Sternoporus in the coastal mouth of China (in Chinese)
37	<i>Pampus chinensis</i>	D-Loop	No	2	Studies on Morphology and genetics of Pampus species (in Chinese)
38	<i>Pampus minor</i>	D-Loop	Yes	2	Studies on Morphology and genetics of Pampus species (in Chinese)
39	<i>Cyclina sinensis</i>	COI	Yes	9	Phylogeography of four marine bivalves along China' coastline, with views into the evolutionary processes and mechanisms (in Chinese)
40	<i>Tegillarca granosa</i>	COI	Yes	9	Phylogeography of four marine bivalves along China' coastline, with views into the evolutionary processes and mechanisms (in Chinese)
41	<i>Scomber japonicus</i>	D-Loop	No	5	Molecular phylogeography of two scomber species in Northwestern Pacific (in Chinese)
42	<i>Scomber japonicus</i>	SSR	Yes	5	Molecular phylogeography of two scomber species in Northwestern Pacific (in Chinese)
43	<i>Konosirus punctatus</i>	D-Loop+COI	Yes	3	Population genetic structure and molecular phylogeography of <i>Konosirus punctatus</i> and <i>Sardinella zunasi</i> (in Chinese)
44	<i>Konosirus punctatus</i>	AFLP	Yes	3	Causations of phylogeographic barrier of some rocky shore species along the Chinese coastline
45	<i>Konosirus punctatus</i>	ISSR	Yes	2	Causations of phylogeographic barrier of some rocky shore species along the Chinese coastline

Table S2. The information of carapace width, carapace length, abdomen width, abdomen length, weight and gender.

Population	Carapace width (cm)	Carapace length (cm)	Abdomen width (cm)	Abdomen length (cm)	Weight (g)	Female: Male
MA	2.04 ± 0.36	1.71 ± 0.34	0.67 ± 0.24	1.41 ± 0.32	5.41 ± 2.25	5:10
