

Supplementary Table S1. Insulin homeostasis traits in African American individuals with normal glucose tolerance and dysglycemia.

	Normal glucose tolerance (n=65)	Dysglycemia (n=64)	P value
Insulin sensitivity	4.66 (3.65)	2.57 (1.82)	<0.0001
Insulin secretion	0.50 (0.44)	0.48 (0.38)	0.51
Disposition index	2.24 (1.06)	1.11 (0.75)	<0.0001
Insulin clearance	0.087 (0.041)	0.084 (0.041)	0.30

Supplementary Table S2. Insulin homeostasis traits in non-Hispanic White individuals with normal glucose tolerance and dysglycemia.

	Normal glucose tolerance (n=124)	IFG (n=100)	P value
Insulin sensitivity	6.15 (4.82)	3.03 (2.35)	<0.0001
Insulin secretion	0.31 (0.19)	0.33 (0.31)	0.25
Disposition index	1.84 (1.15)	0.97 (0.65)	<0.0001
Insulin clearance	0.13 (0.045)	0.11 (0.043)	<0.0001

Supplementary Table S3. Insulin homeostasis traits in individuals with normal glucose tolerance and prediabetes.

	Normal glucose tolerance (n=189)	PreDM (n=136)	P value
Insulin sensitivity	5.57 (4.59)	3.08 (2.32)	<0.0001
Insulin secretion	0.35 (0.29)	0.38 (0.39)	0.081
Disposition index	1.93 (1.10)	1.10 (0.62)	<0.0001
Insulin clearance	0.11 (0.054)	0.093 (0.045)	<0.0001

Supplementary Table S4. Insulin homeostasis traits in individuals with normal glucose tolerance and impaired glucose tolerance.

	Normal glucose tolerance (n=189)	IGT (n=63)	P value
Insulin sensitivity	5.57 (4.59)	2.67 (2.42)	<0.0001
Insulin secretion	0.35 (0.29)	0.33 (0.33)	0.74
Disposition index	1.93 (1.10)	0.92 (0.38)	<0.0001
Insulin clearance	0.11 (0.054)	0.096 (0.051)	0.0005

Supplementary Table S5. Insulin homeostasis traits in individuals with normal glucose tolerance and impaired fasting glucose.

	Normal glucose tolerance (n=189)	IFG (n=109)	P value
Insulin sensitivity	5.57 (4.59)	2.76 (2.31)	<0.0001
Insulin secretion	0.35 (0.29)	0.40 (0.38)	0.030
Disposition index	1.93 (1.10)	1.10 (0.71)	<0.0001
Insulin clearance	0.11 (0.054)	0.092 (0.042)	<0.0001

Supplementary Table S6. Parameter estimates and area under the receiver operating characteristics curve for logistic regression models examining the association of four insulin homeostasis traits with prediabetes, in separate models and for models combining traits.
