

A)

B)

Legend: (A) The original uncropped image of Western blot in Figure 1 (left side; 7 lanes). The BJ-5ta CRISPR-Cas9 knockout clones were tested by Western blot using the anti-LEO1 A300-175A antibody (BETHYL company) at 1/1000 dilution. (B) The picture shows RED Ponceau stain of gel before cutting of gel (cut next to size marker right side; 7 lanes) and transfer for Western blot.
