^aACI – average coefficient of infection values for two years.

^bACI rank of the level of resistance based on disease score across 42 carriers of Yr genes based on 2nd observation: wheat entries having ACI values of 0-10, 11-20, 21-30, 31-60 were regarded as possessing high (R), moderate-resistant (MR), moderate-susceptible (MS)and low (S) level of adult plant resistance.

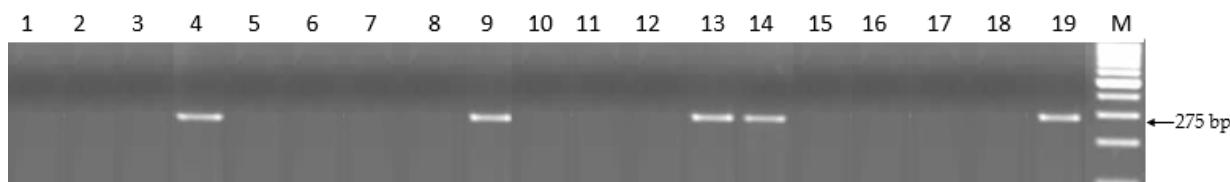

Table S3. Mean daily temperature and relative humidity s (Almalybak, Almaty region, Kazakhstan, 2019 and 2020).

Year	Month	Temperature (°C)	Monthly rainfalls (mm)	Average relative humidity (%)
2019	April	11,4	168	
	May	16,6	39	59,50
	June	21,6	72	
2020	April	11,4	140	
	May	16,6	47	57,30
	June	21,8	30
