

Figure S1. Total ion chromatograms of methanolic extract from the selected *Solanum* species analyzed by HPLC TOF MS. Peak numbers correspond to glycoalkaloid compounds identified in Table 1.

*Solanum muricatum*

*Solanum caripense*

*Solanum nigrum* (Blackberries)

*Solanum melanocerasum*

*Solanum quitoense*

*Solanum sysimbrifolium*

*Solanum retroflexum*

*Solanum nigrum* (Orange Berry)
