

## Supplemental Figures

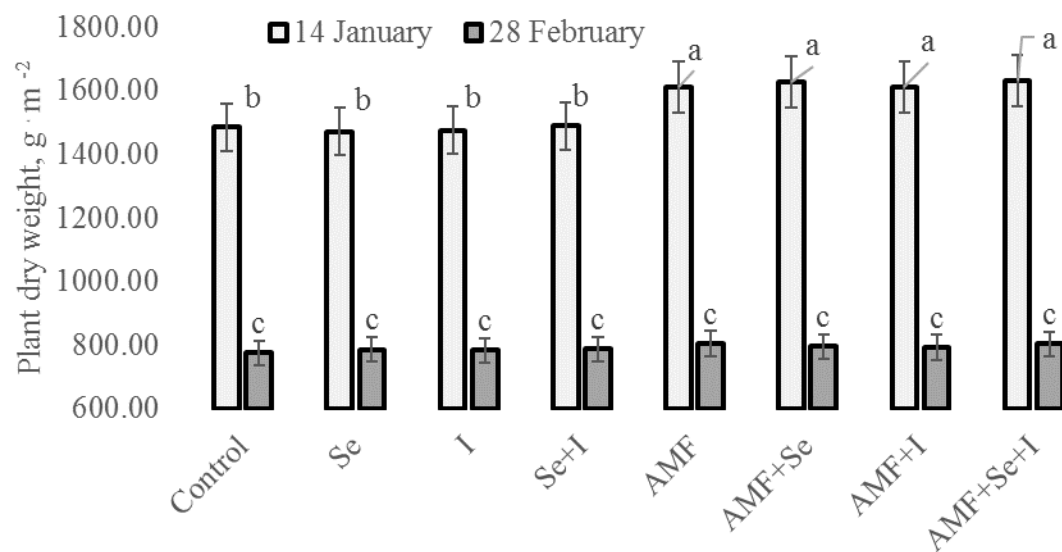

**Figure S1.** Interaction between planting time and AMF biofortification on the seed yield. Values followed by different letters are significantly different according to Duncan's test at  $p \leq 0.05$ .

**Figure S2.** Interaction between planting time and AMF biofortification on the seed number per plant. Values followed by different letters are significantly different according to Duncan's test at  $p \leq 0.05$ .

**Figure S3.** Interaction between planting time and AMF biofortification on seed dry weight. Values followed by different letters are significantly different according to Duncan's test at  $p \leq 0.05$ .

**Figure S4.** Interaction between planting time and AMF biofortification on plant dry weight. Values followed by different letters are significantly different according to Duncan's test at  $p \leq 0.05$ .
