

Supplementary Material

Table S1. The association between attitude statements and demographic characteristics.

Statements	Q10. I possess a good understanding of biosimilar products.				Q11. Generally, I feel comfortable prescribing biosimilars to patients because I am confident about their safety and efficacy.				Q12. The nonproprietary name of biosimilars should be distinguishable from the reference product.				Q13. If necessary, I accept the switch to a biosimilar product for patients receiving treatment of its reference product.				Q14. I would only prescribe a biosimilar product to those who have never received treatment with its reference drug (i.e., biologic-naïve).				Q15. I am familiar with the regulations of the Taiwan Food and Drug Administration (TFDA) on biosimilars.				Q16. The non-proprietary name of biosimilar drugs should not be distinguishable from the reference product (respondent reliability).
