

Supplementary Figure S1. Origin of NRG1 in LT from DBDs in a genetic obesity model. (A) Levels of NRG1 in steatotic and non-steatotic livers. B) NRG1 levels in plasma and liver at 10 min, 2 and 6 hours after the BD induction. *P < 0.05 versus Sham; +P < 0.05 versus LT.

Supplementary Figure S2. Relevance of NRG1 on hepatic functionality and cell endothelial damage in steatotic and non-steatotic LT from DBDs in a nutritional obesity model. ALP, total bilirubin levels, vWF, and HA levels in plasma. *P < 0.05 versus LT; +P < 0.05 versus BD+LT.
