

Supplementary Materials:

Table S1. Examples of Adipokines that possess HB-domain.

Fibroblast growth factor-1	Fibroblast growth factor-2	Vascular endothelial growth factor A₁₆₅	Vascular endothelial growth factor A₁₈₉
Placental growth factor	Heparan binding epithelial growth factor	Hepatocyte growth factor	Transforming growth factor- β
Interferon γ	Platelet derived growth factor-BB	Platelet derived growth factor AA	Pleotrophin
Platelet factor 4	Interleukin 8	Macrophage inflammatory protein 1	Interleukin 10
