Data presented as pg of analyte per mg of total protein. *p*-values were calculated using Mann-Whitney U test and are presented for the comparison of groups "pregnancy" vs. "no pregnancy". \*, *p*-values significant after the Benjamini-Hochberg adjustment for multiple comparisons.

**Table S3.** Complete results of correlation analysis for hemoglobin and all the studied immune mediators.

Immune Mediator	Spearman's Rank Correlation Coefficient for Hemoglobin	<i>p</i> -Value
