

Table S1. Distribution of underlying diseases among study subjects

Disease category	No. of patients (%)
Behavioral disorder	180 (0.7)
Congenital and genetic disorder	4,670 (17.3)
Dermatologic disease	398 (1.5)
Endocrinologic disease	1,679 (6.2)
Gastrointestinal disease	2,591 (9.6)
Genitourinary disease	1,254 (4.7)
Hemato-oncologic disease	5,665 (21)
Infectious disease	703 (2.6)
Injury and intoxication	899 (3.3)
Musculoskeletal disease	1,347 (5)
Neurologic disease	2,126 (7.9)
Ophthalmic and otologic disease	1,031 (3.8)
Others	4,380 (16.3)

All diseases diagnosed by the patient are included, and there may be more than one diagnosis pertaining to an individual.

Table S2. Heart rate centiles by age during the daytime (from 8:00 to 20:00)

Age	Centile												
	1st	3rd	5th	10th	15th	25th	50th	75th	85th	90th	95th	97th	99th
0–<3 months	118	123	127	131	135	140	149	158	162	166	171	174	180
3–<6 months	112	117	120	124	127	132	140	149	153	156	161	164	169

The difference of each measurement was defined as the nighttime measurement minus the daytime measurement. Daytime was defined as 8:00 to 20:00, and nighttime was defined as 20:00 to 8:00 the next day.

HR = heart rate, RR = respiratory rate, SE = standard error

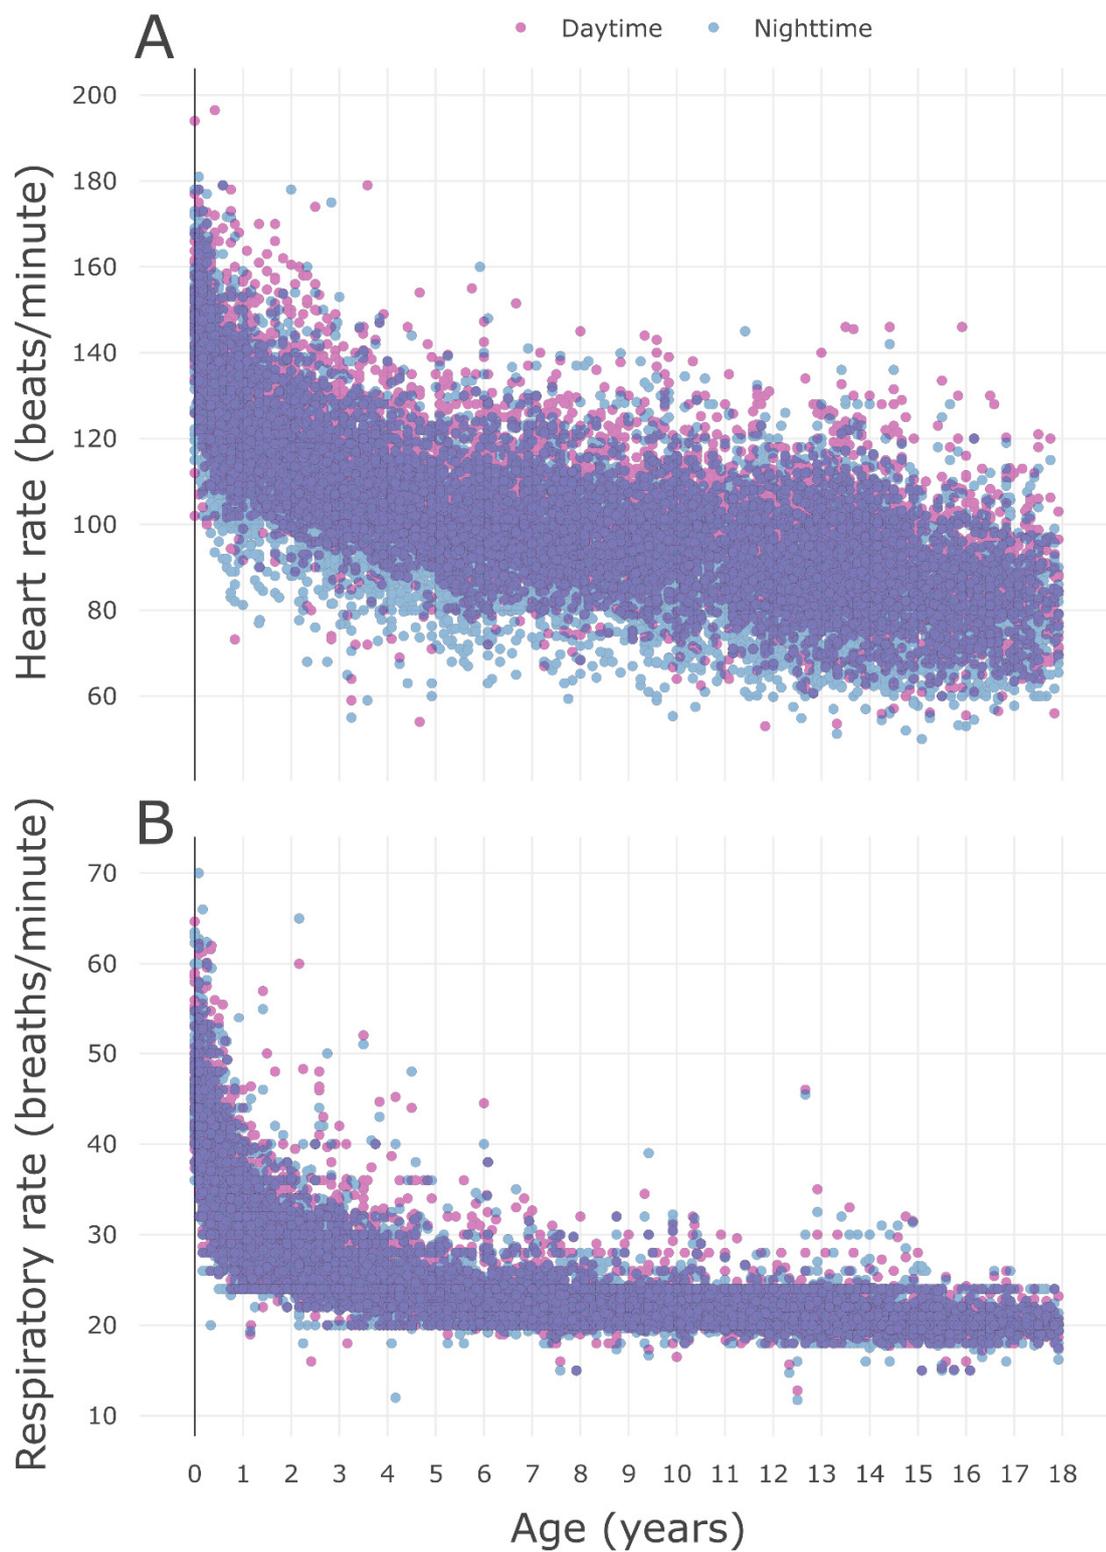

Figure S1. Scatter plot of vital signs by time period

The distribution of (A) heart rate and (B) respiratory rate is shown. Daytime was defined as 8:00 to 20:00, and nighttime was defined as 20:00 to 8:00 the next day.

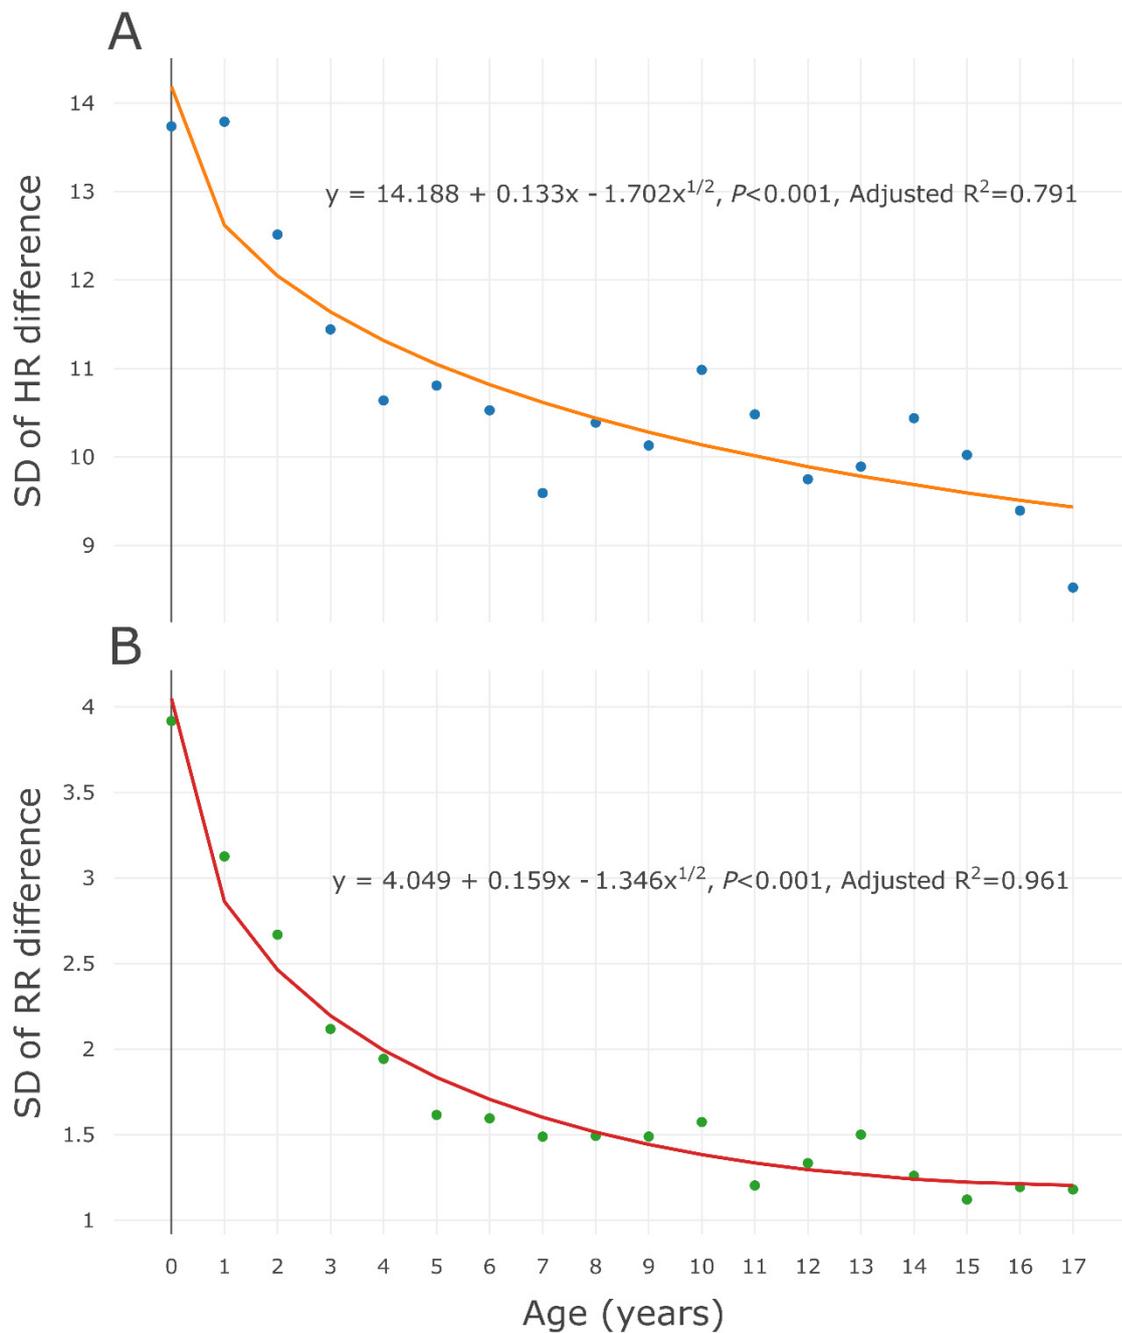

Figure S2. SD changes of differences in vital signs by age

The difference in vital signs was defined as the value obtained by subtracting the measured value of daytime from the measured value of nighttime. Nighttime was defined as from 8:00 pm to 8:00 am the next day, and daytime was defined as from 8:00 am to 8:00 pm. (A) SD of HR difference by age, and (B) SD of RR difference. Both HR and RR differences show a statistically significant decrease as age increases.

SD = standard deviation, HR = heart rate, RR = respiratory rate

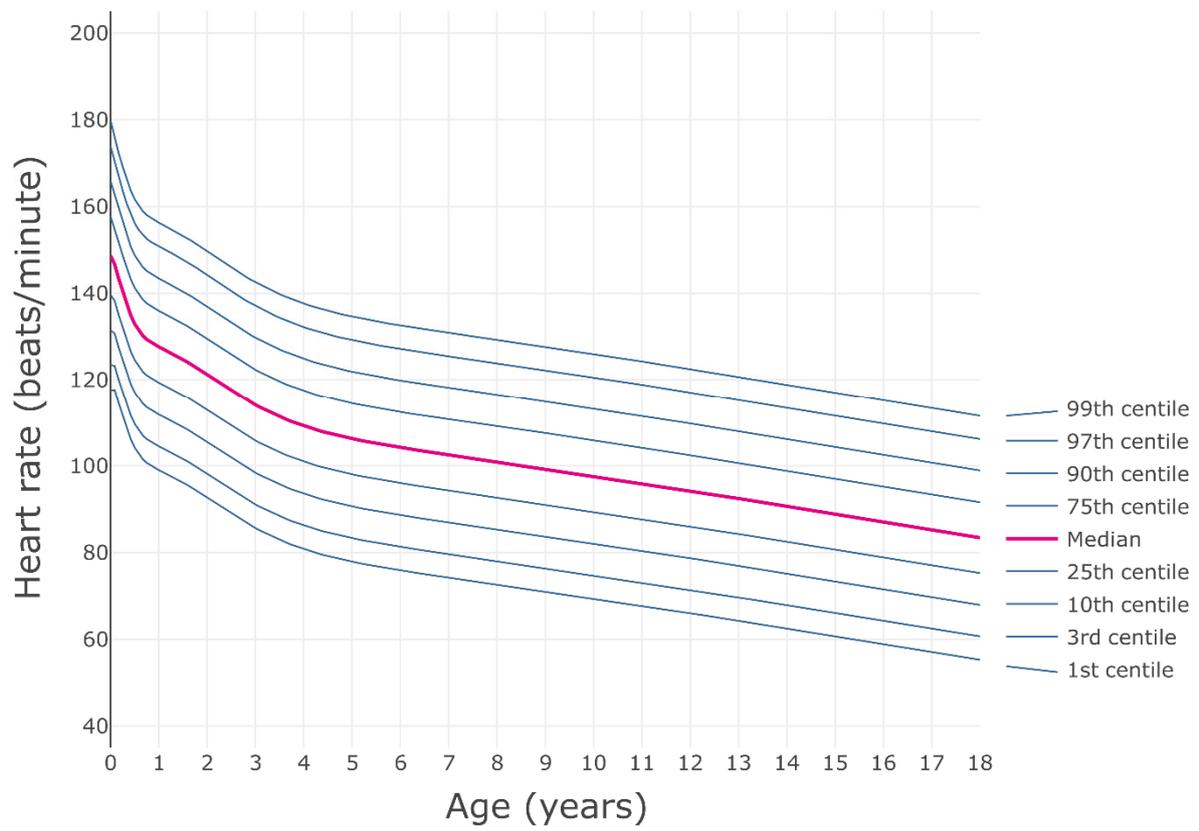

Figure S3. Centile curve of heart rate by age in the daytime (from 8:00 to 20:00)

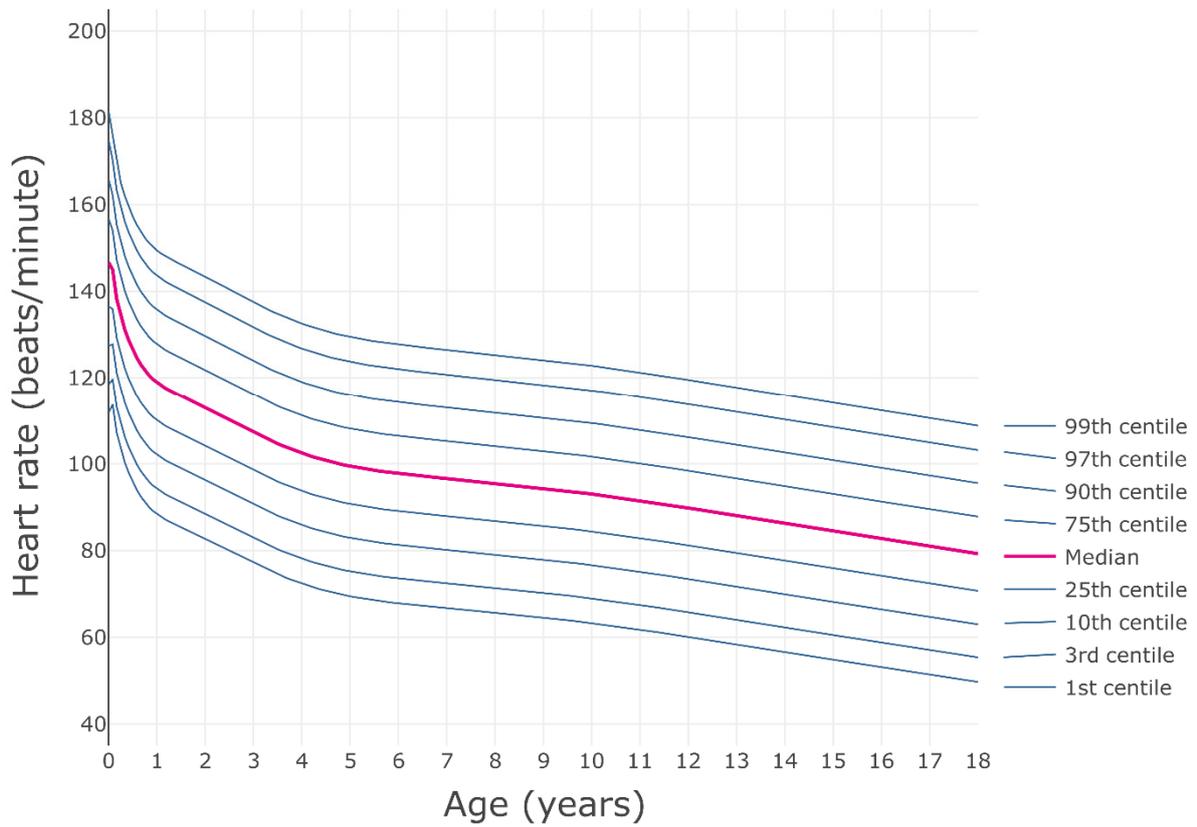

Figure S4. Centile curve of heart rate by age in the nighttime (from 20:00 to 8:00 the next day)

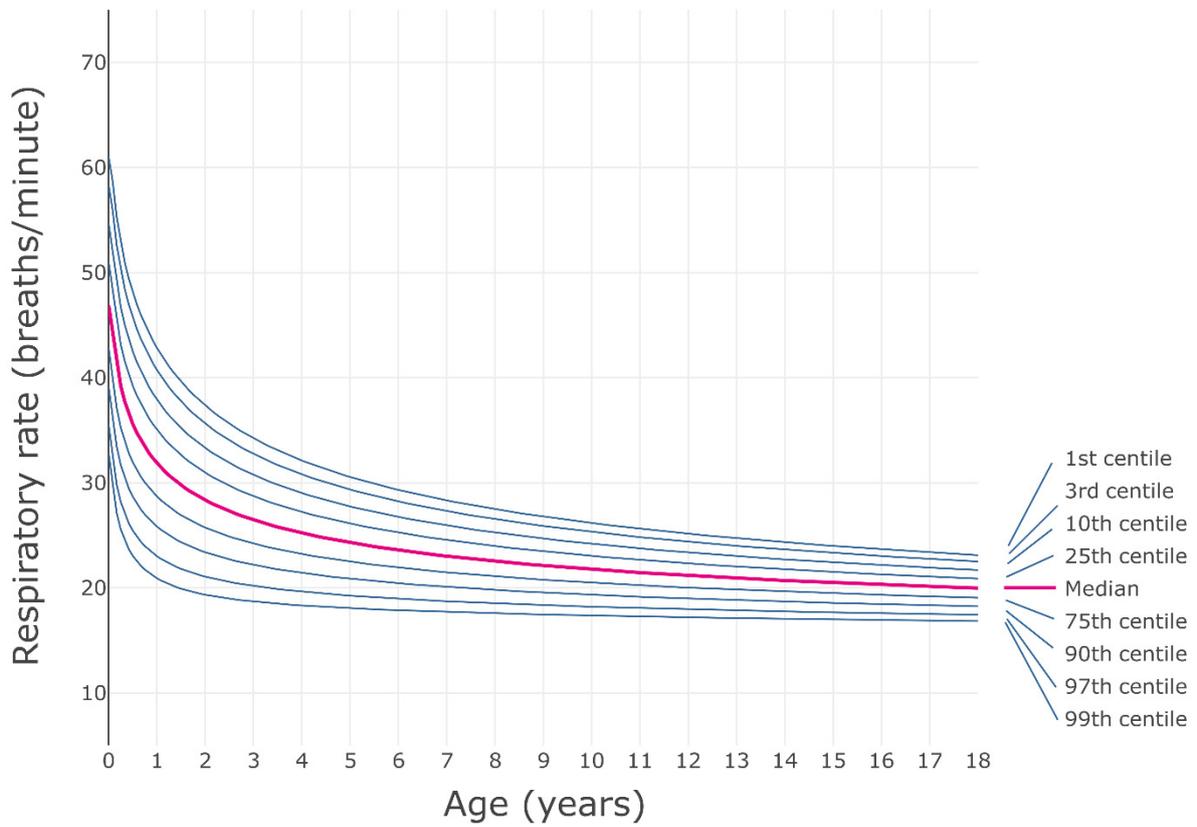

Figure S5. Centile curve of respiratory rate by age in the daytime (from 8:00 to 20:00)

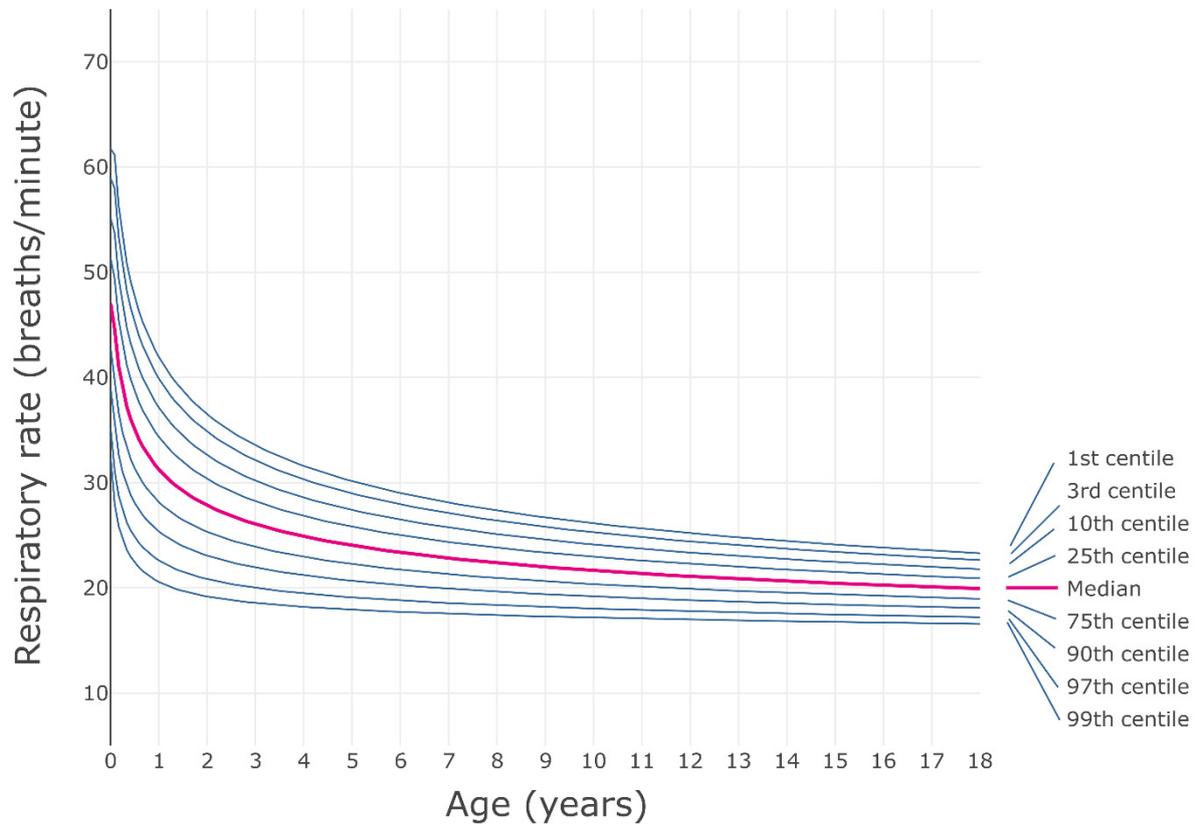

Figure S6. Centile curve of respiratory rate by age in the nighttime (from 20:00 to 8:00 the next day)

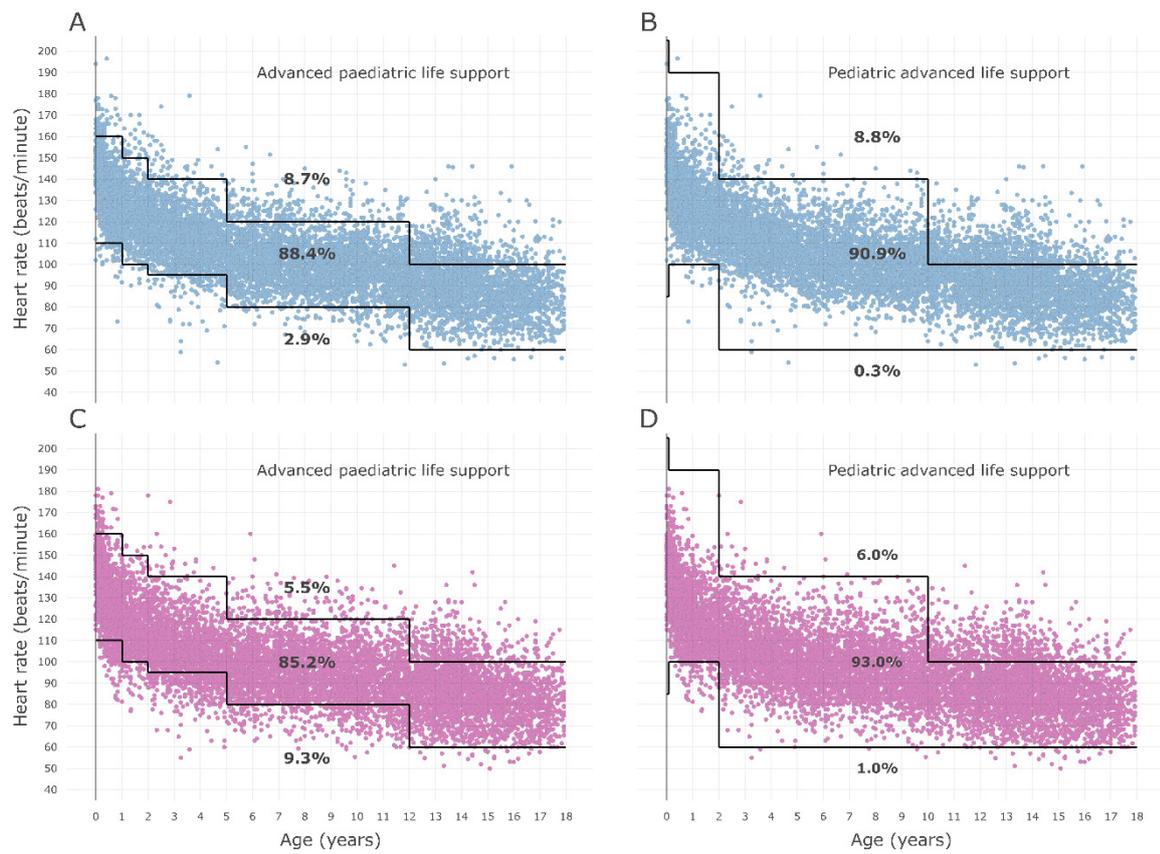

Figure S7. Centile curves for heart rate by age

Centile curves of heart rate by age with visual comparison against the centile curves from advanced paediatric life support (A and C) and paediatric advanced life support (B and D) guidelines. Scatter plots of daytime (A and B) and nighttime (C and D)

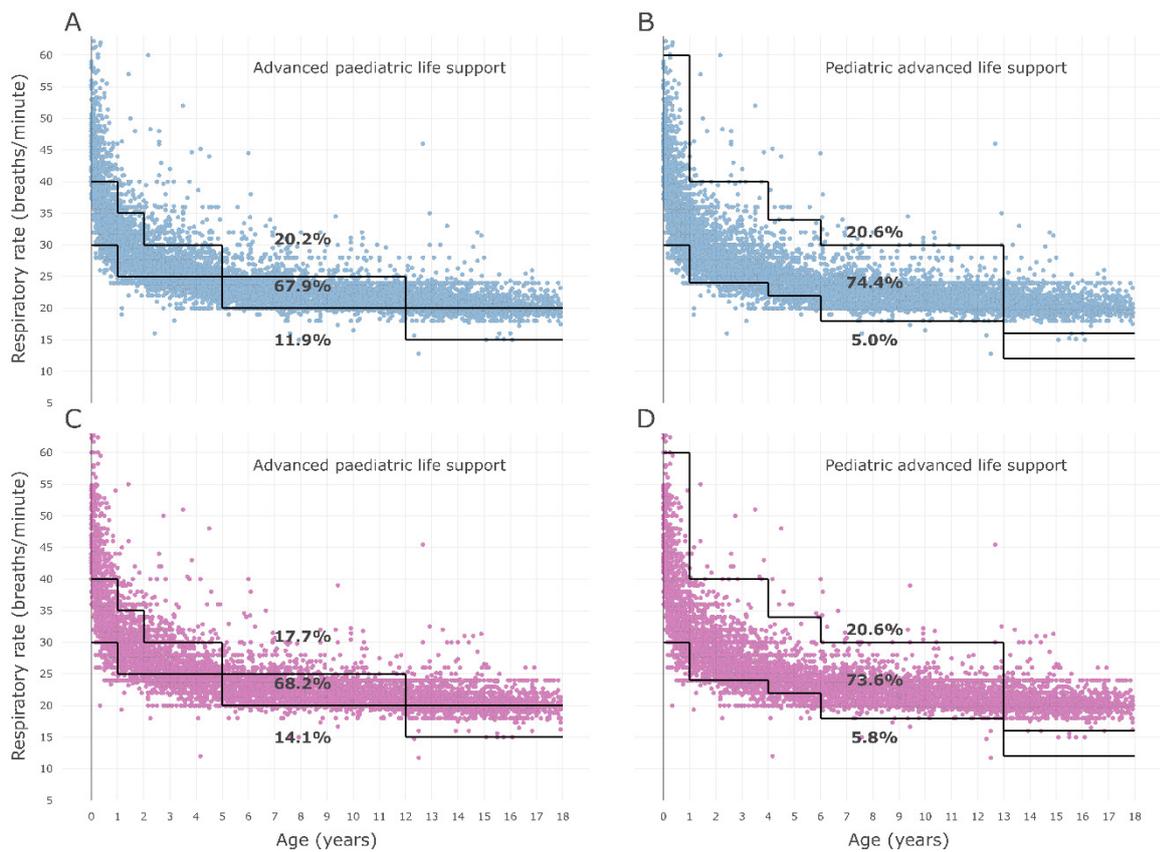

Figure S8. Centile curves for respiratory rate by age

Centile curves of respiratory rate by age with visual comparison against the centile curves from advanced pediatric life support (A) and pediatric advanced life support (B) guidelines. Scatter plots of daytime (A and B) and nighttime (C and D)
