

Supplementary Materials: Concentration of lipase from *Aspergillus oryzae* expressing *Fusarium heterosporum* by nanofiltration to enhance transesterification

Hans Wijaya, Kengo Sasaki, Prihardi Kahar, Emmanuel Quayson, Nova Rachmadona, Jerome Amoah, Shinji Hama, Chiaki Ogino, and Akihiko Kondo

Table S1. Retention time of target compound of fatty acid methyl ester obtained in Gas Chromatography-Mass Spectrometer analysis.

Carbon chain length	Mean retention time (min) $\pm$ SD
C8:0 (Internal standard)	6.5 $\pm$ 0.2
C14:0	10.0 $\pm$ 0.1
C16:0	11.6 $\pm$ 0.2
C18:0	13.5 $\pm$ 0.1
C18:1 cis	13.8 $\pm$ 0.1
C18:2 cis	14.0 $\pm$ 0.1

Note: SD – standard deviation.
