**Table of contents**

	<b>Page</b>
<b>Figure S1:</b> Canopy appearance the 13 July 2021. On the left: not defoliated row; on the right: total leaf removal in the bunch zone to induce sunburn symptoms.	3
<b>Figure S2:</b> Example of berry classification based on the sunburn symptoms: (a) no symptomatic berries, (b) amber colored berries, (c) severely damaged berries, (d) completely dry berries.	4
<b>Figure S3:</b> Impact of the canopy management on the berry quality. On the left, an example of a bunch obtained in the leaf removed row; on the right, an example of a bunch collected in the not defoliated condition.	5

**Figure S1.** Canopy appearance the 13 July 2021. On the left: not defoliated row; on the right: total leaf removal in the bunch zone to induce sunburn symptoms.

**Figure S2.** Example of berry classification based on the sunburn symptoms. (a) asymptomatic berries, (b) amber colored berries, (c) severely damaged berries, (d) completely dry berries.

**Figure S3.** Impact of the canopy management on the berry quality. On the left, an example of a bunch obtained in the leaf removed row; on the right, an example of a bunch collected in the not defoliated condition.
