

**Table S1:  $p$  values for statistical tests on data for T cell population frequencies**

	2 DPI	4 DPI	7 DPI
CD4+CD8-	0.59 (11.41)	0.59 (3.27)	0.79 (27.80)
CD4-CD8+	0.84 (2.88)	0.45 (0.42)	0.45 (1.37)
CD4+CD8+	0.87 (0.85)	0.82 (0.12)	0.84 (1.33)

*Table S1.  $P$  values obtained by multiple unpaired  $T$  tests on data for T cell population frequencies when testing for a difference between the inoculated group and the control group. The number in parenthesis is the SE of the difference between the groups. The  $P$  value is adjusted with the Holm-Šidák method for multiple tests.*
