Disrupted Value-Directed Strategic Processing in Individuals with Mild Cognitive Impairment: Behavioral and Neural Correlates

Lydia T. Nguyen, Elizabeth A. Lydon, Shraddha A. Shende, Daniel A. Llano, & Raksha A. Mudar

Table S1. Statistical Results for the Effects of Version on Behavioral Data.

		Interaction: Version x Value
List 1	$F(1,34)$	1.55
	p	.222
List 2	$F(1,34)$	2.48
	p	.124
List 3	$F(1,34)$	0.06
	p	.803
List 4	$F(1,34)$	0.01
	p	.912
List 5	$F(1,34)$	0.53
	p	.474

Cells display statistics for interaction effects between version (words in uppercase being assigned to high-value/words in lowercase being assigned to high-value) and value (high-value/low-value) for each of the five lists. There were no significant differences observed across versions.
