

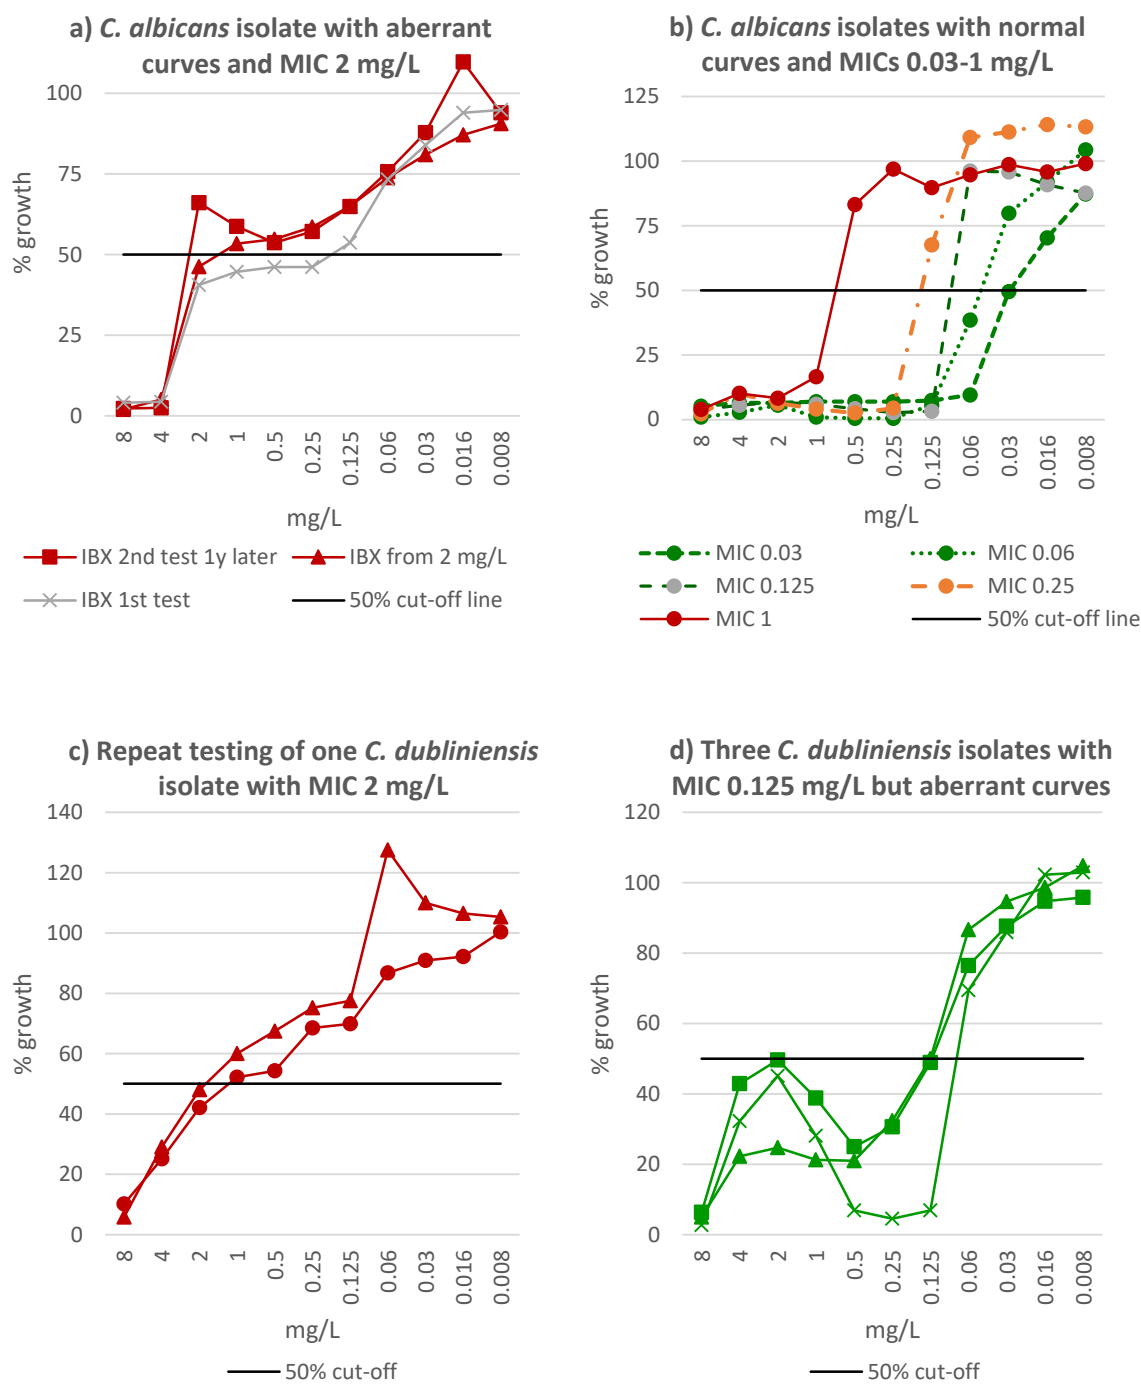

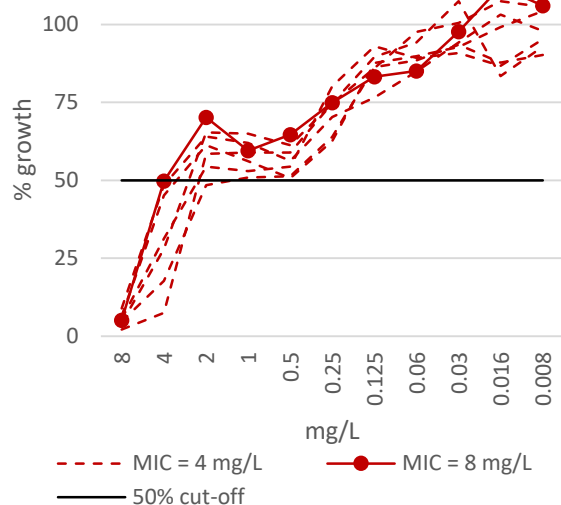

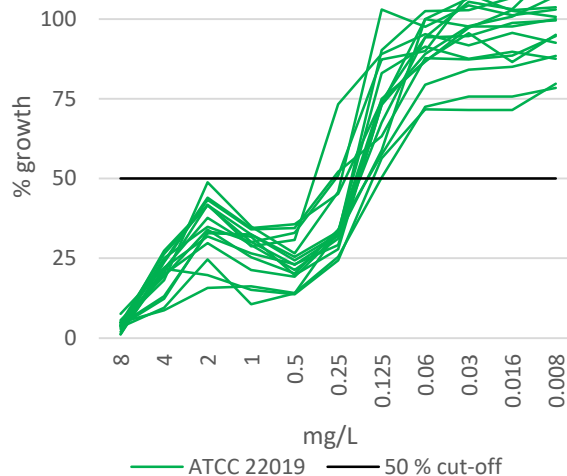

**Figure S1.** Growth curve examples for isolates defined as ibrexafungerp wild-type and non-wild-type adopting the WT-UL 97.5%

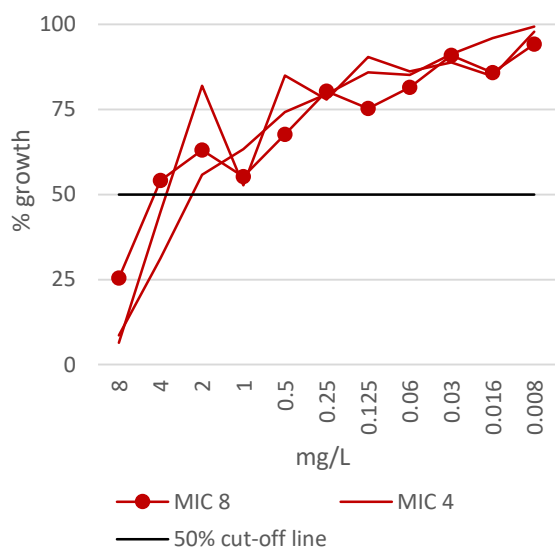

e) *C. parapsilosis* isolates with aberrant curves and MIC 4-8 mg/L

f) *C. parapsilosis* QC strain ATCC 22019 tested 16 times

g) *C. tropicalis* isolates with MIC 4-8 mg/L

h) Three *C. tropicalis* isolates with aberrant curves and three random comparators
