

Figure S1. Comparison of Pj fungal load (median and CI 95) in episodes of proven PjP, probable PjP and Pj colonization according to HIV-status of the patient. (a) episodes occurring in HIV-positive patients and (b): in HIV-negative patients. Comparison of the three groups was analyzed using Kruskal-Wallis test followed by Dunn's multiple comparison test. * < 0.001, ** < 0.0001.
