

Figure S2. Phenotype of *OfSPL11* transgenic plants. **(A)** Fifteen-day-old plants of the WT and three *OfSPL11* transgenic lines. Scale bars = 1cm. **(B)** Plants and **(C)** stems length of 5-week-old plants of the WT and transgenic lines; representative specimens of average length were selected. Scale bars = 2cm. ** $p < 0.01$ were used to determine statistical significance.
