

Supplemental Information

Table S1: List of selected members of different allergen families with their origin, route of exposure, predicted linear epitopes using the AlgPred2.0 online tool and known conformational and linear B-cell epitopes determined using the IEDB.

Family name	Allergen Name	Origin	Route of exposure	Predicted sequential epitopes	known conformational B cell epitopes	known linear B Cell epitopes	# of known linear B Cell epitopes	# of known linear T Cell epitopes
