

Supplementary material: Morphotypological evaluation of the muscular chain.

Body variables	Closing	Opening
Head (total = 1 point)	Forward head Rectified cervical	Backward head Hyperlordosis cervical
Shoulders (total = 1.5 points)	R / L anteriorly R / L depression R / L abduction scapula	R / L posteriorly R / L elevation R / L adduction scapula
Dorsal (total = 1 point)	Dorsal spine flexed in more than 2/3 Dorsal spine rectified in less than 2/3	
Low back (total = 1 point)	Crossing point of the muscular chain. Mark 1 point for each morphology	
Pelvis (total = 1 point)	Retroverted	Anteverted
Knees (total = 1.5 points)	R / L valgus R / L internal rotation R / L flexed	R / L varus R / L external rotation R / L extended
Foot (total = 1 point)	R / L valgus hindfoot R / L valgus forefoot	R / L varus hindfoot R / L varus forefoot
Morphopathological diagnosis		

Legend: L = Left; R = Right.
