The NMR spectra at 400.1 MHz (^1H), 128.4 MHz (^{11}B) and 100.0 MHz (^{13}C) were recorded with Varian Inova-400 and Brucker-400 spectrometers. All spectra were processed in MestRenova version 6.0.2-5475. When processing ^{11}B NMR and ^{11}B NMR $\{^1\text{H}\}$ spectra, the baseline alignment was applied to improve the quality of integration.
