## Figures

**Figure S1.** Geographical regions of Small Island Developing States (SIDS). The numbers in the brackets represent the amount of SIDS in each respective region. AIS: Atlantic, Indian Ocean and South China Seas.

**Figure S2.** Average composition of the Gross Domestic Product (GDP) of Small Island Developing State (SIDS) regions by sectors as of 2017/2018 [1]. Note that (1) the sum of the sectors (% of GDP) sometimes exceeds 100 % due to data being pooled from available data in 2017 and 2018, and, (2) data is missing for some SIDS as stated in Table 1.

**Figure S3.** Average imports and exports as a percentage of the Gross Domestic Product (GDP) by Small Island Developing State (SIDS) regions [1]. Note that data is missing for some SIDS as stated in Table 1.

## Tables

Table S1. Targets of Sustainable Development Goal (SDG) 14 - Life Below Water [2].

<b>Target 14.1</b>	<b>Prevent and Reduce Marine Pollution</b>	By 2025, prevent and significantly reduce marine pollution of all kinds, particularly from land-based activities, including marine debris and nutrient pollution.
<b>Target 14.2</b>	<b>Manage and Protect Marine and Coastal Ecosystems</b>	By 2020, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration, to achieve healthy and productive oceans.
<b>Target 14.3</b>	<b>Address Impacts of Ocean Acidification</b>	Minimize and address the impacts of ocean acidification, including through enhanced scientific cooperation at all levels.
<b>Target 14.4</b>	<b>Restore Fish Stocks</b>	By 2020, effectively regulate harvesting, and end overfishing, illegal, unreported and unregulated (IUU) fishing and destructive fishing practices and implement science-based management plans, to restore fish stocks in the shortest time feasible at least to levels that can produce maximum sustainable yield as determined by their biological characteristics.
<b>Target 14.5</b>	<b>Protect 10 % of Coastal and Marine Areas</b>	By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on best available scientific information.
<b>Target 14.6</b>	<b>Reform Fishery Subsidies</b>	By 2020, prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing, and eliminate subsidies that contribute to IUU fishing, and refrain from introducing new such subsidies, recognizing that appropriate and effective special and differential treatment for developing and least developed countries should be an integral part of the World Trade Organization (WTO) fisheries subsidies negotiation.
<b>Target 14.7</b>	<b>Increase Benefits from the Sustainable Use of Marine Resources</b>	By 2030, increase the economic benefits to Small Island Developing States (SIDS) and Least Developed Countries (LDCs) from the sustainable use of marine resources, including through sustainable management of fisheries, aquaculture and tourism.
<b>Mean 14.a</b>	<b>Increase Research Capacity and Marine Technology Transfer</b>	Increase scientific knowledge, develop research capacities and transfer marine technology taking into account the Intergovernmental Oceanographic Commission Criteria and Guidelines on the Transfer of Marine Technology, in order to improve ocean health and to enhance the contribution of marine biodiversity to the development of developing countries, in particular SIDS and LDCs.
<b>Mean 14.b</b>	<b>Provide Access to Resources and Markets for Small Fisheries</b>	Provide access of small-scale artisanal fishers to marine resources and markets.
<b>Mean 14.c</b>	<b>Implement the UN Convention Law of the Sea</b>	Ensure the full implementation of international law, as reflected in the United Nations Convention on the Law of the Sea (UNCLOS), which provides the legal framework for the conservation and sustainable use of oceans and their resources, as recalled in paragraph 158 of "The Future We Want".
