Although many educational researchers were pioneers in the integration of technology into teaching and learning prior to 2000, institutions started extensively adopting technology in their courses around this period. However, the adoption process was slow and mainly followed the traditional mode of teaching in the formal university learning environment. The COVID-19 pandemic's disruption "forced" everyone to use technology for teaching and learning purposes, supporting synchronous and/or asynchronous teaching and learning processes.

This book aims not only to present successful practice examples from before or during the COVID-19 pandemic, but also to provide useful information to university teachers, assisting them in further understanding the higher education context, demands and challenges of digital education. Including evidence from the current higher education landscape from all over the world and discussing various frameworks allows institutions and policymakers to take decisions about the future digital education transformation, while teachers and educational researchers can find examples of how various digital learning tools (i.e., virtual simulations and e-portfolios) are integrated into teaching and learning processes in various environment (i.e., online, and blended learning). Considering experiences prior to the COVID-19 pandemic alongside the opportunities and challenges brought about by the pandemic, this book can support the higher education sector in considering curriculum reformations and introducing innovative teaching and learning approaches to meet the Industrial 4.0 revolution.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

### **High Visibility**

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis lieferbarer Bücher (VLB).

### **Print on Demand and Multiple Formats**

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
