Message from the Guest Editors

Dear Colleagues,

This Special Issue is designed to spotlight contemporary research on corporate social responsibility (CSR) and green innovation from a COVID-19 perspective. What has been going on in the CSR field for the last two years that warrants investigation? Moreover, the global economy has been disastrously impacted by COVID-19, but the ways that business organizations, governments, and policy makers are using CSR strategies to mitigate stakeholders' demands are emerging concepts that we are only just beginning to understand and investigate. CSR uses a strategic matter rather than a philanthropic approach via global corporation to gain sustainability. Furthermore, the devastation being caused by climate change mandates a greater emphasis on green innovation.

- corporate social responsibility/CSR
- green innovation
- COVID-19
- carbon emissions
- climate change
- technological innovation
- research and development
- environmental reporting
