Message from the Guest Editors

Dear colleagues,

This proposed special issue aims to advance knowledge about the prevention and coping processes at micro, meso, and macro levels to explore the antecedents and the process from multi-disciplinary and multi-method perspectives. We aim to explore conceptualizations and provide innovative empirical perspectives and advance methodological approaches that can enrich the understanding of these dimensions that account to promote workers' wellbeing, healthy work relationships and workplaces.

Keywords:

- Wellbeing at work
- Healthy work relationships
- Healthy workplaces
