submissions:

25 October 2024

Message from the Guest Editor

Dear Colleagues,

There is considerable interest and investment in information that can transform our food production systems towards a more sustainable future. The diverse nature of the farming landscape, with animals, plants, soil, and water in the farm environment, provides a wide range of opportunities for solutions that can bring about financial, environmental, and social change. Innovative technologies and advanced methods can help manage valuable soil, plant, and animal stocks, as well as providing early warnings for poor performance. This advanced support helps farmers to make timely and informed decisions, as well as changes in practice, in order to enhance the efficiency and sustainability of production.

Original research or review articles should cover recent or future farm-level developments.

Prof. Dr. Matt J. Bell

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
