Message from the Guest Editors

In recent years, several advancements in functional genomic approaches and tools, have been attained. These tools have been utilized or are being utilized for numerous purposes, including nutritional improvement and stress tolerance in several agricultural and horticultural crop species. In this context, advancements in the use of functional genomics and genome engineering tools for crop biofortification for nutritional improvement, nutraceuticals improvement, flavonoid enrichment, yield improvement, disease resistance, virus resistance, abiotic stress tolerance, etc. should be covered in this field. Moreover, the applications of these tools in oil seed crops, vegetables, ornamental plants, etc., should also be included.

This Special Issue focuses on the application of advances in functional genomics approaches for the nutritional, quality, and yield improvements in various agricultural and horticultural crops. For this reason, it welcomes highly interdisciplinary quality studies from disparate research fields, including agriculture, horticulture, functional genomics, plant biotechnology, gene cloning, characterization, etc. Original research articles and reviews are accepted.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
