closed (5 November 2023)

Message from the Guest Editor

This Special Issue focuses on the identification of sugarcane germplasm resources and disease resistance for the changing needs of sugarcane production due to climate change. The issue welcomes original research and reviews covering all related topics, including phenotypic and genotypic identification and evaluation of germplasm resources and disease resistance; improvement of crop genetics for disease resistance by conventional and modern technology; germplasm screening and pathogen detection methods. The issue welcomes original research and reviews covering all related topics, including phenotypic and genotypic identification and evaluation of germplasm resources, genome editing for disease, identification of molecular bases of resistance, and germplasm screening and pathogen detection methods.

Keywords

- germplasm
- resistance
- disease
- sugarcane
- breeding
- selection
- molecular markers
- transformation
- screening
- genotype
- phenotype

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q2 (*Plant Science*)
